## SQUIRRELS & CONIFERS

- Remove the green food cubes from the game and use the pink “squirrel” cubes instead.
- Whenever a brown wood cube is placed on the map (during setup or replenishment), place a conifer tree next to it, if one is available.
- Place a pink cube beside any tree you just placed and beside any tree without a squirrel during replenishment.

**Note:** *The pink cubes are more accessible for color blind players and may also be used apart from the expansion rules.*
