FLED

THE GOVERNOR'S HOUND

Unlike his master, the hound was a kind soul, eager to please.

The canine's penchant for fetching contraband did not go unnoticed by the prisoners, who often rewarded him with a tasty bone.

The Bits

1 Dog Meeple

3 Clover Tiles

3 Bone Tiles

Playing the Expansion

The hound begins the game on the Starting Yard Tile. During your turn, you may add contraband to your hand matching the room that the hound occupies, regardless of the whistle charm's location. Thematically, the dog fetches the contraband for you.

On your turn, you may discard a **bone** tile from your hand to move the hound up to 3 rooms. The hound may move through

double archways and tunnels only. When entering a tunnel, the hound may emerge at any other tunnel on the map, counting this as one of your three moves.

Like other tools, a bone tile may be added to your inventory for **2vp**.

All clover tiles, including the three bonus ones in this expansion, may be used as a “wild” to represent any tool—including a bone.
