

The game is meant to be played with 2-4 players.

At the start of the game, each player will roll the dice with the numbers on it to decide the order of who goes first.

You can decide if you want the lowest number wins or the highest number wins.

Once everyone knows when they will play their character, it is time to start!

The players will each take turns rolling the dice with the numbers on it which will tell you how many spaces you move your character.

After the person rolls and places their character, then they will pick up a (Bee) card which can either impact the player in a good way ex. (the player moves up 3 spaces.) or it can negatively impact you ex. (the player moves back 3 spaces.)

Once a person reaches the star located on the board or rolls a number past it, they are one step closer to winning.

The player will now have to use the color dice and number dice.

The player will now pick a (Star) card which will have an objective that the player needs to role such as, roll a 3 and the color red.

Once the player rolls what the card says, **THEY WIN!!!**
