# MAKE THE SHAPE

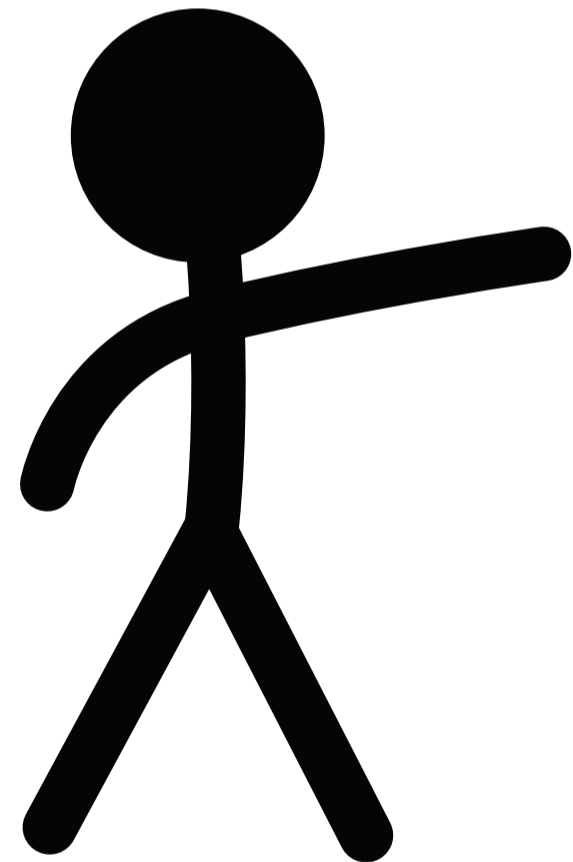

☆ Guide Booklet ☆

Welcome!

**Hello!**

**I don't like reading.  
So, I made you this video!**

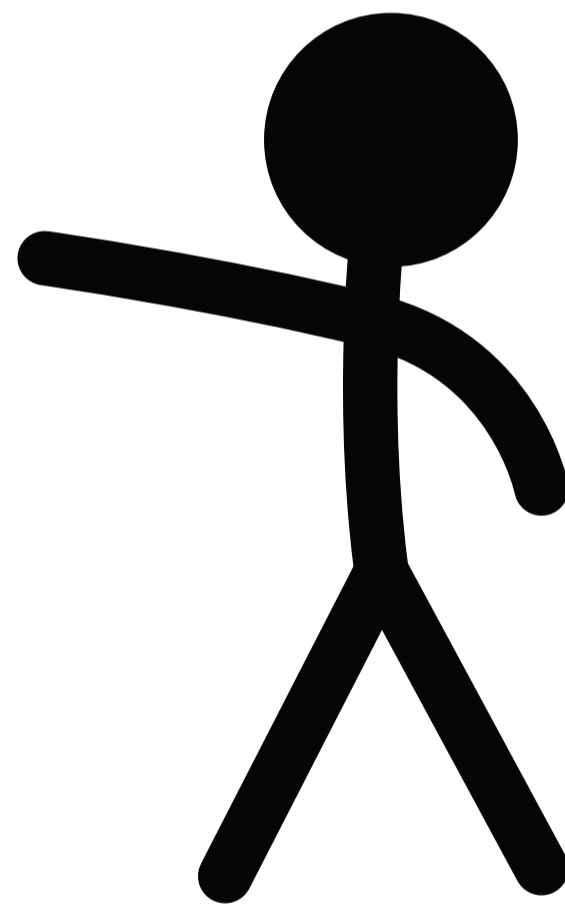

How To Play

Join the galactic  
shape-masters guild!

**Join our community of  
nice people who also love  
Make The Shape!**

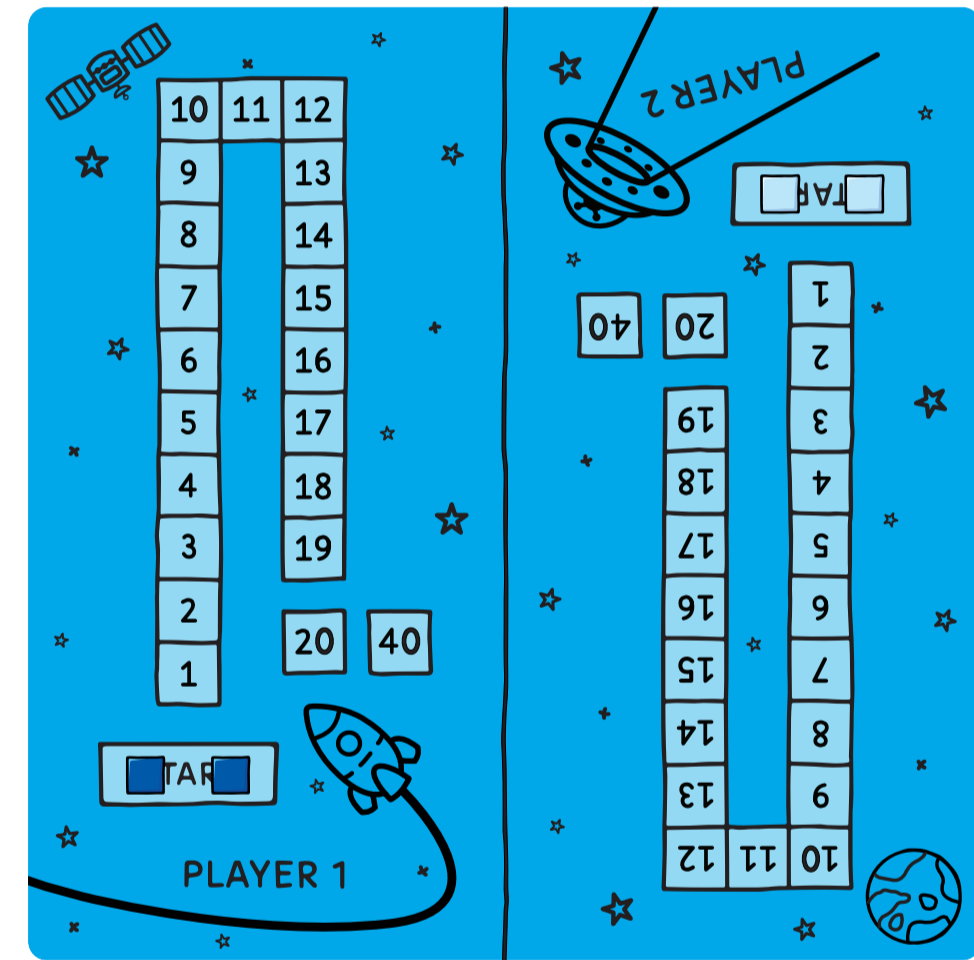

# Setup

Player 2 Secret Shape

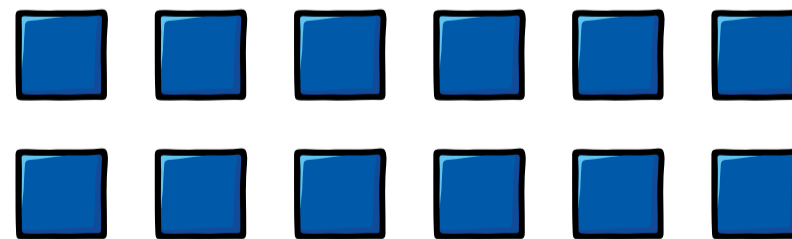

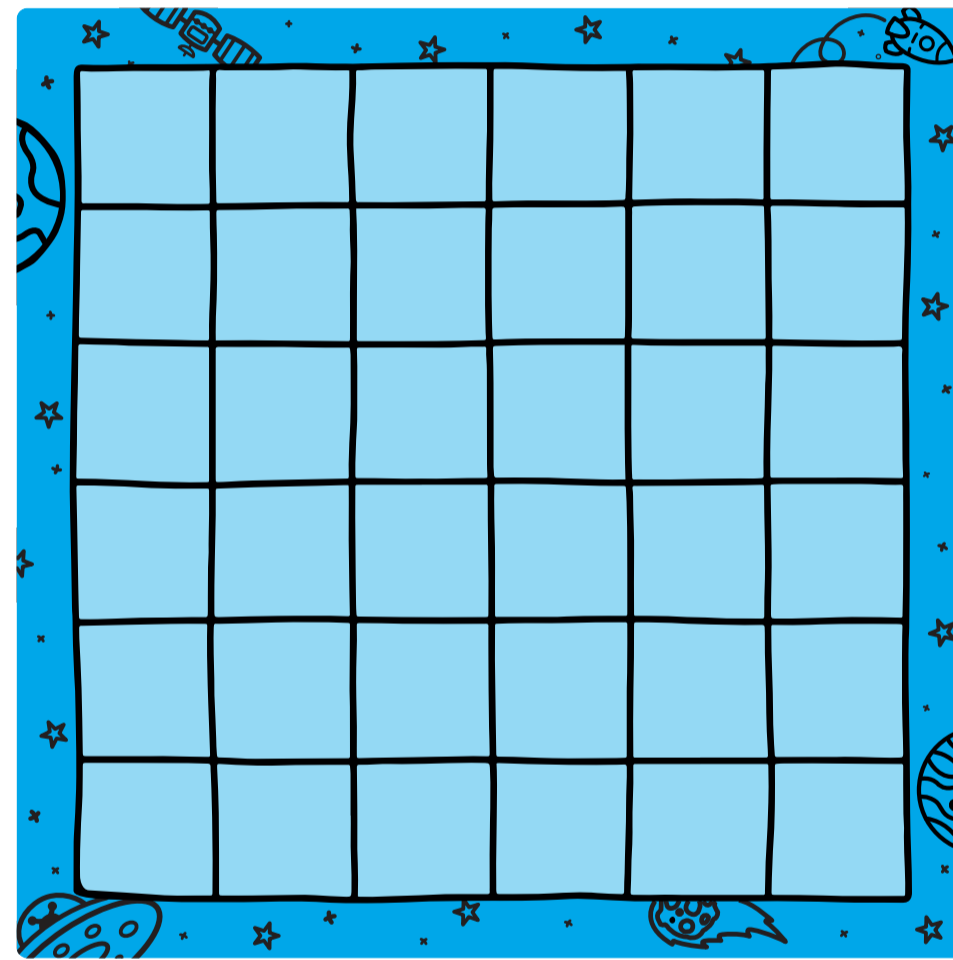

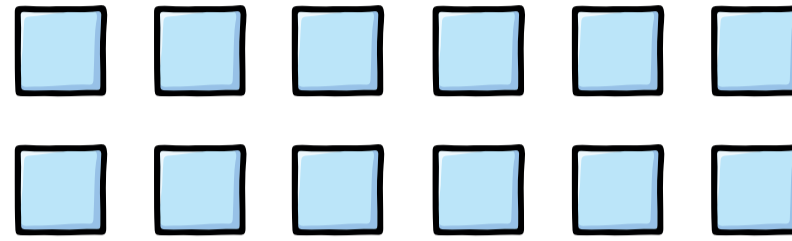

Score Tracker

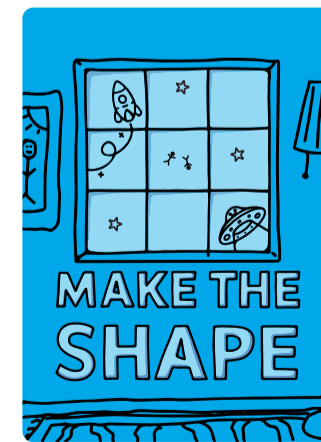

PLAYER 1

PLAYER 2

Player 2 Cubes

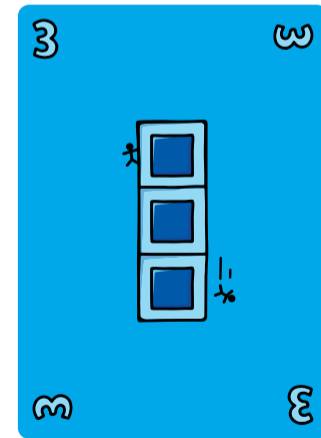

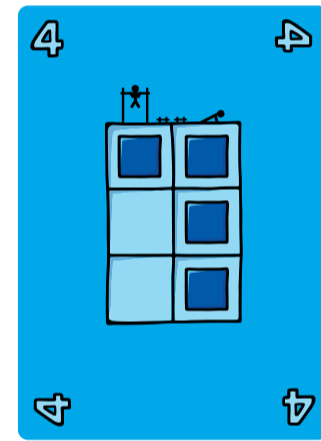

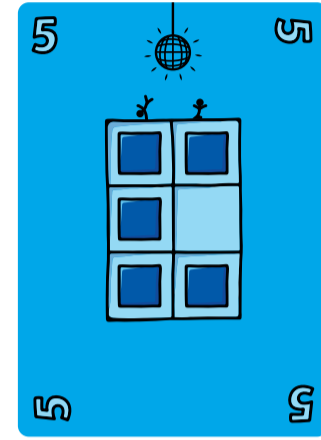

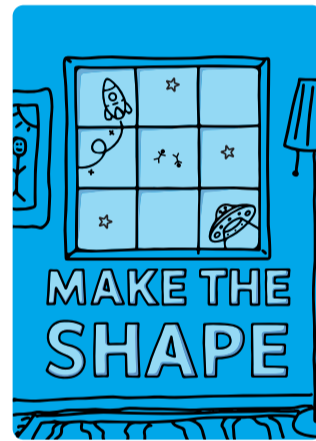

Player 1 Cubes

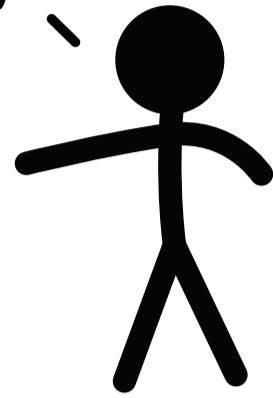

Player 1 Secret Shape

Draw Pile

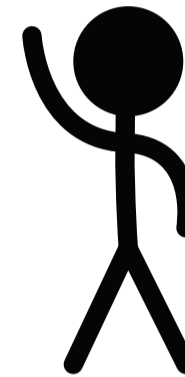

Public Shapes

Hey!  
Set the game up like that.

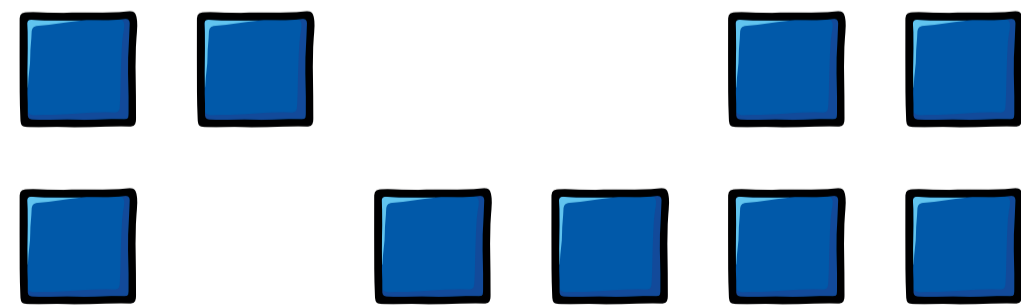

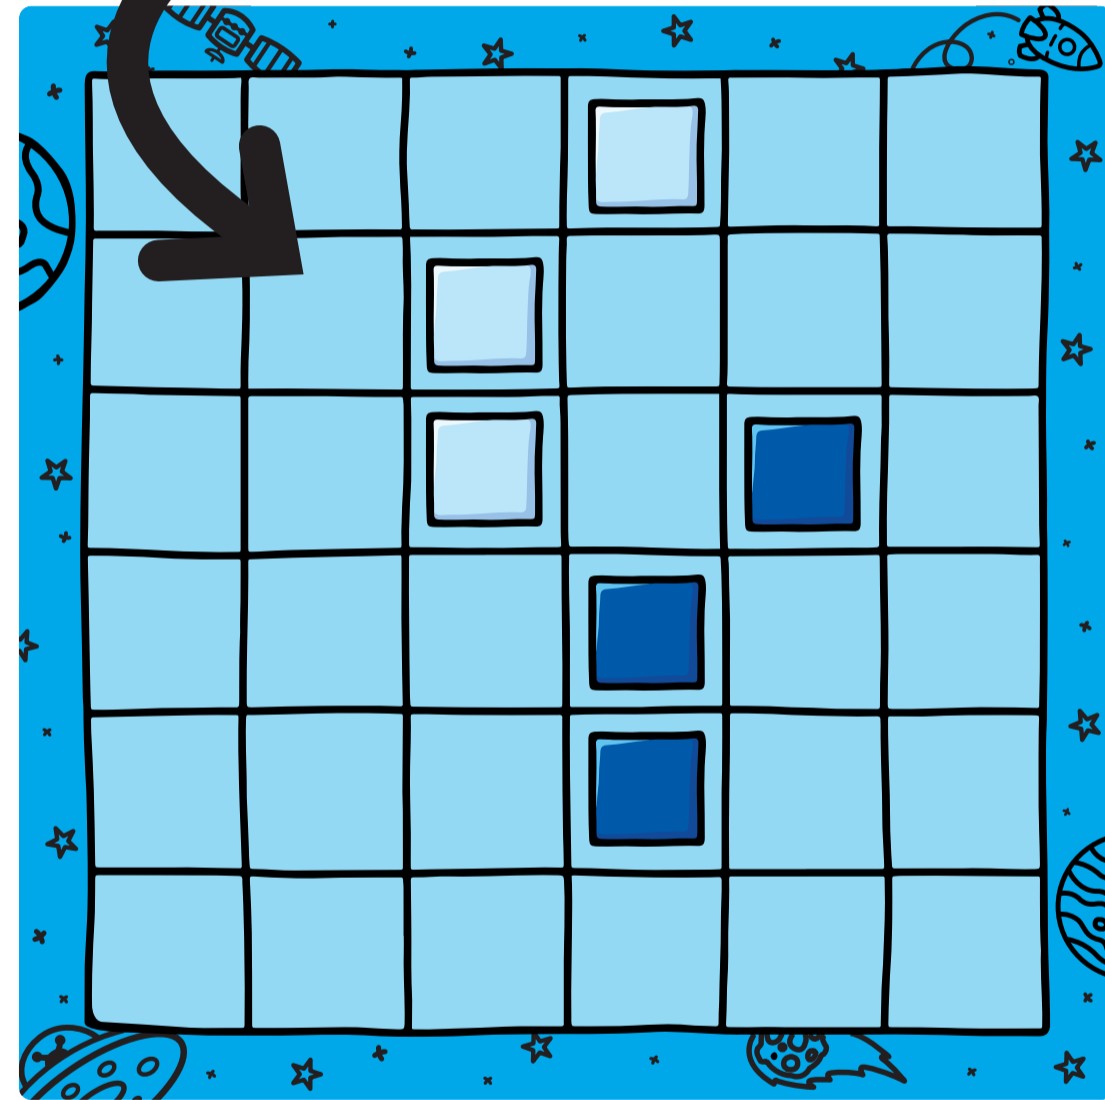

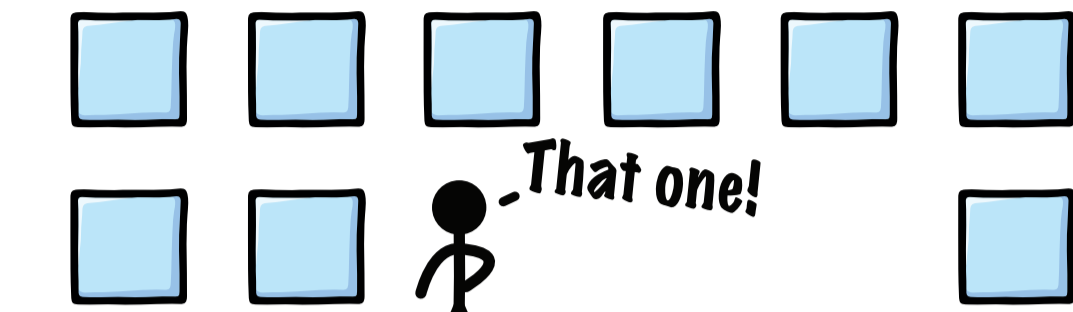

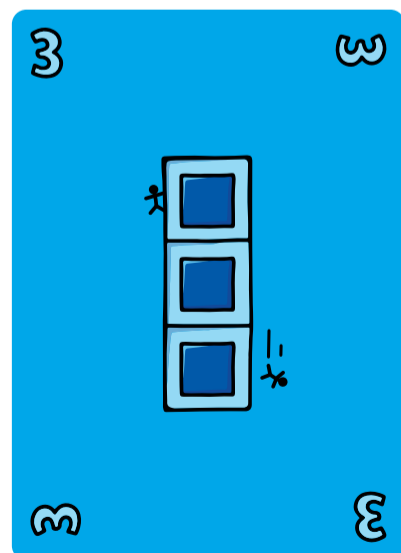

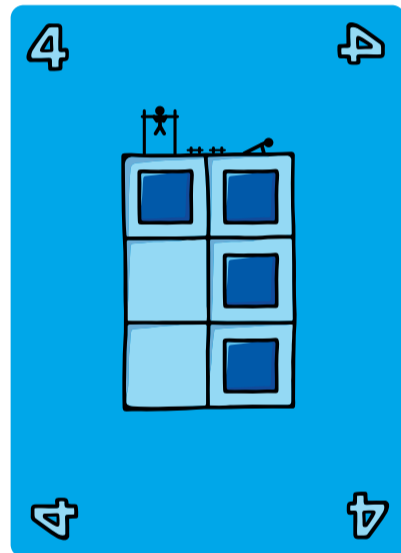

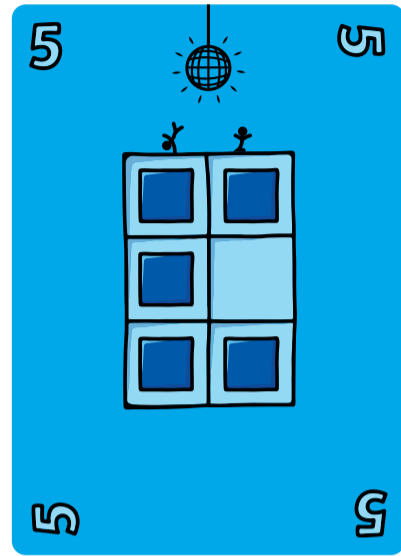

Oh!  
Play Rock-Paper-Scissors  
to see who goes first!

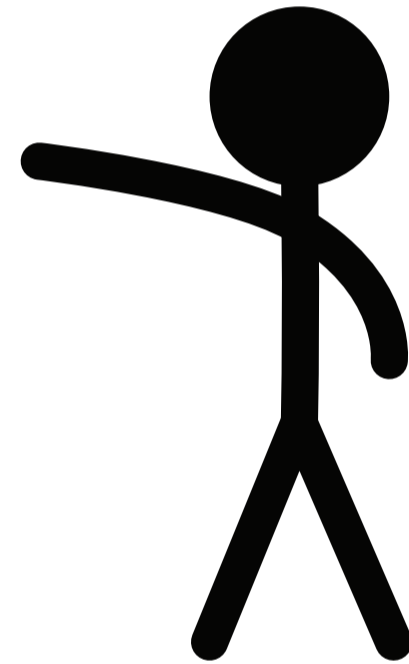

- Each player has 12 cubes.
- Shuffle the deck.
- Draw 3 cards & place them face-up next to the board.
- Each player draws 1 card for their secret shape.
- You can look at your own secret shape.
- Place your 2 score tracker cubes on the start position.
- Now you are ready to play Make The Shape!

Note: Want a challenge? Use less cubes. Increase the points. Only high cards.  
Secrets only. Endless replayability!

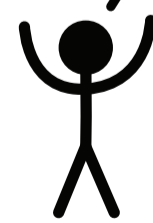

# Moves

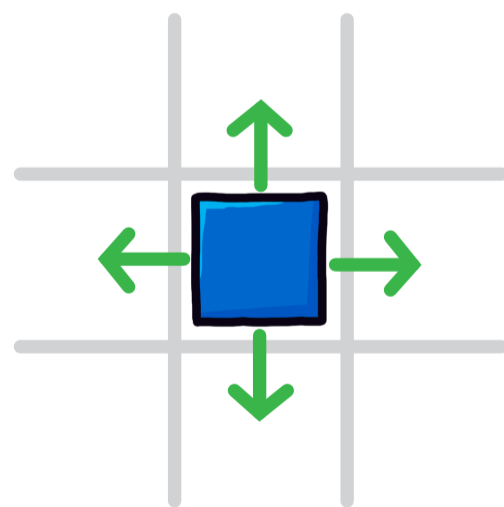

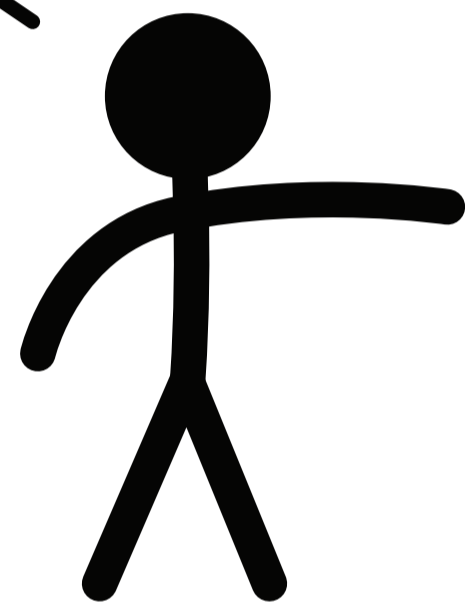

**You can place one of your cubes  
onto an empty space.**

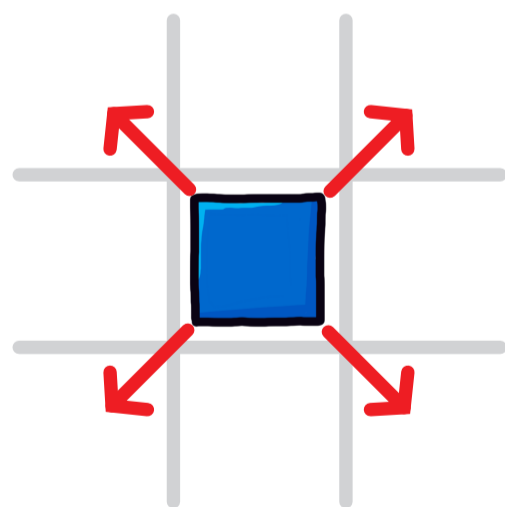

**Cheating!  
I didn't get a giant arrow!**

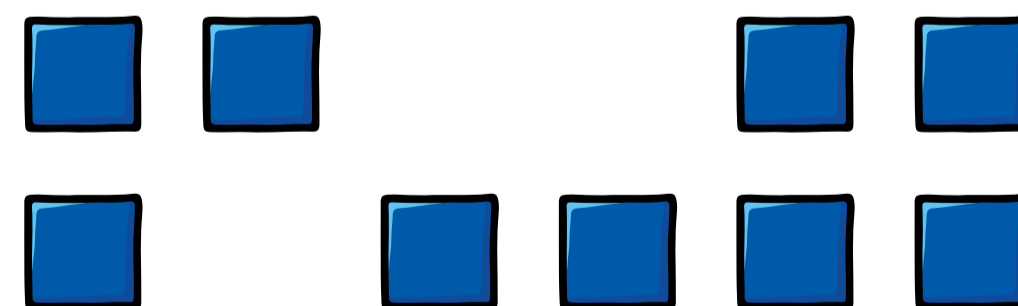

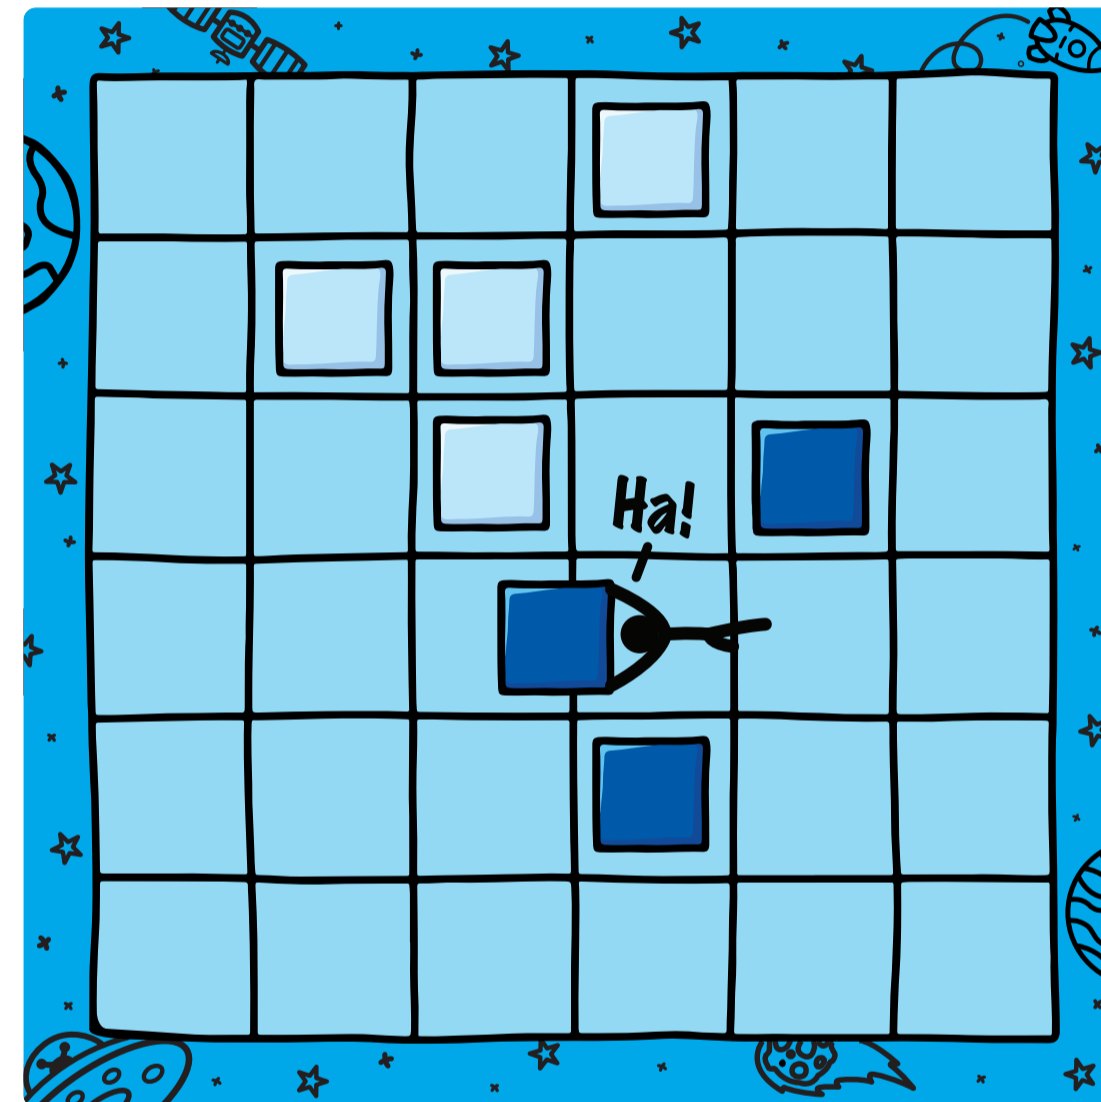

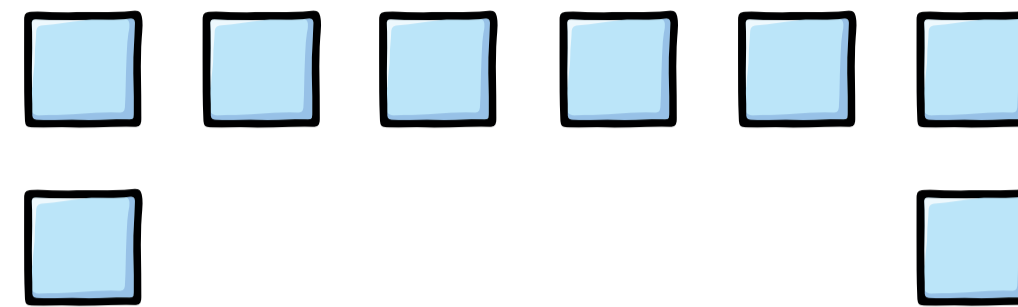

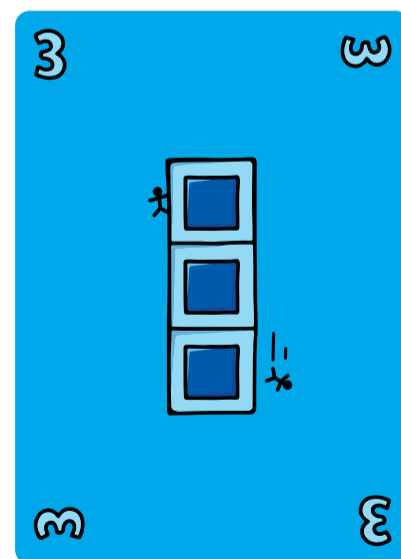

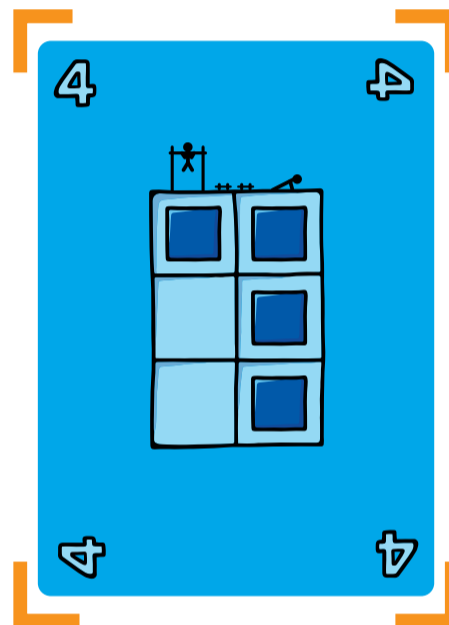

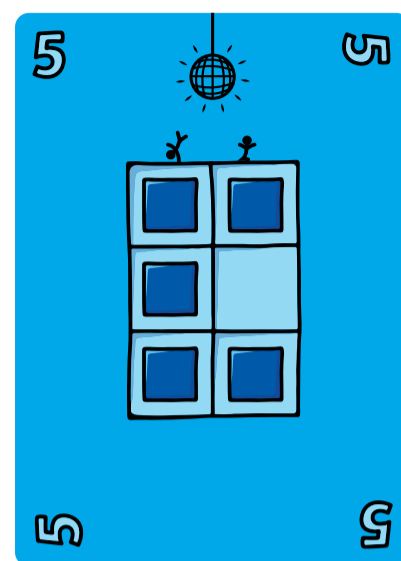

Or you can move one of your cubes to one adjacent empty space horizontally or vertically.

Valid move

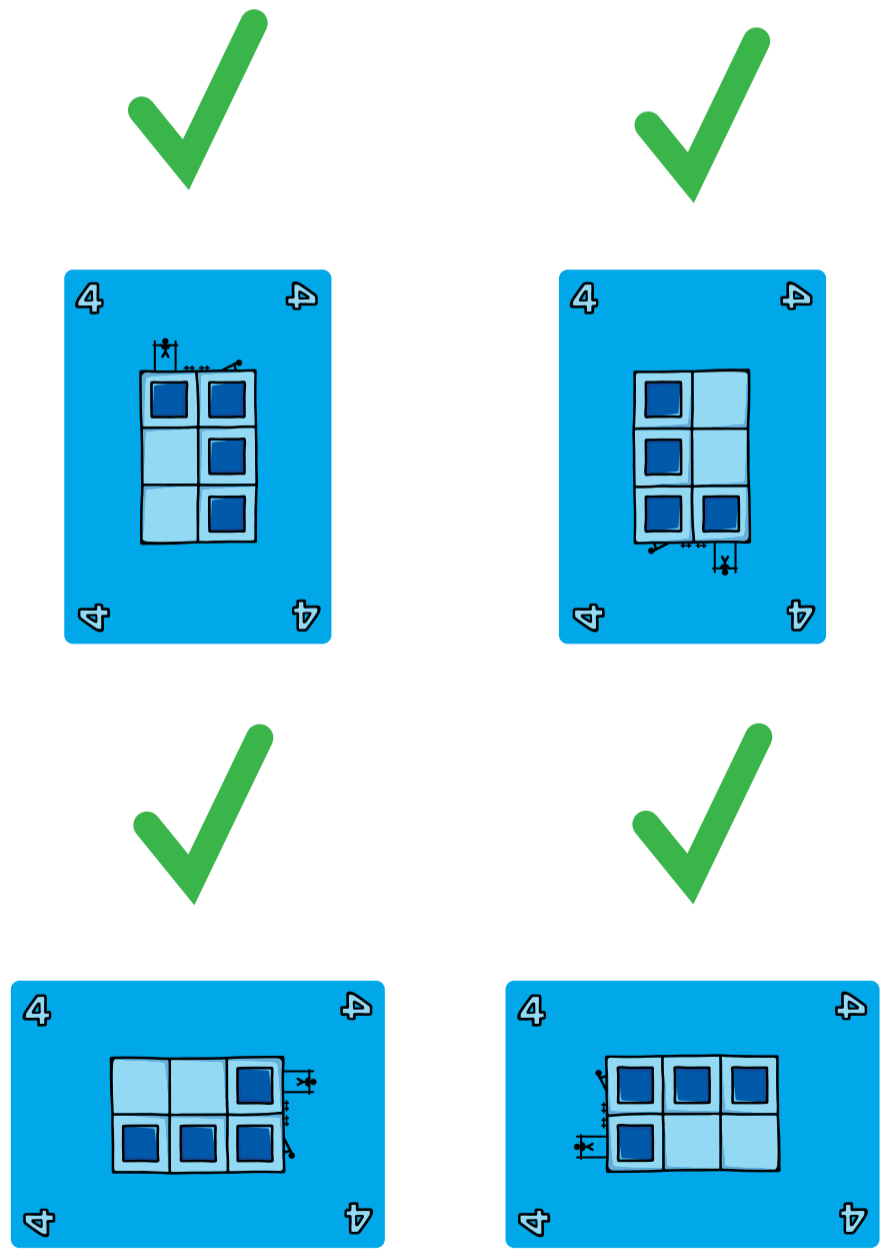

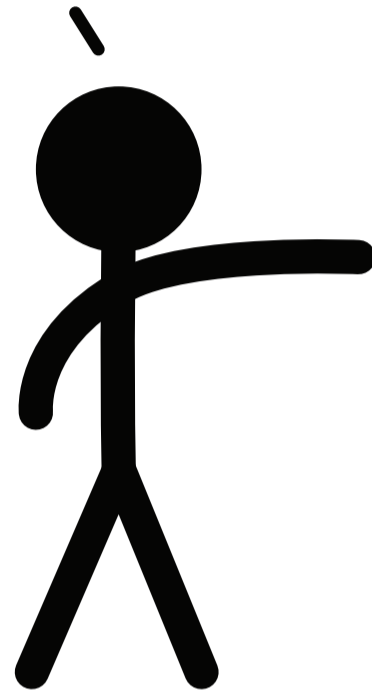

Invalid move

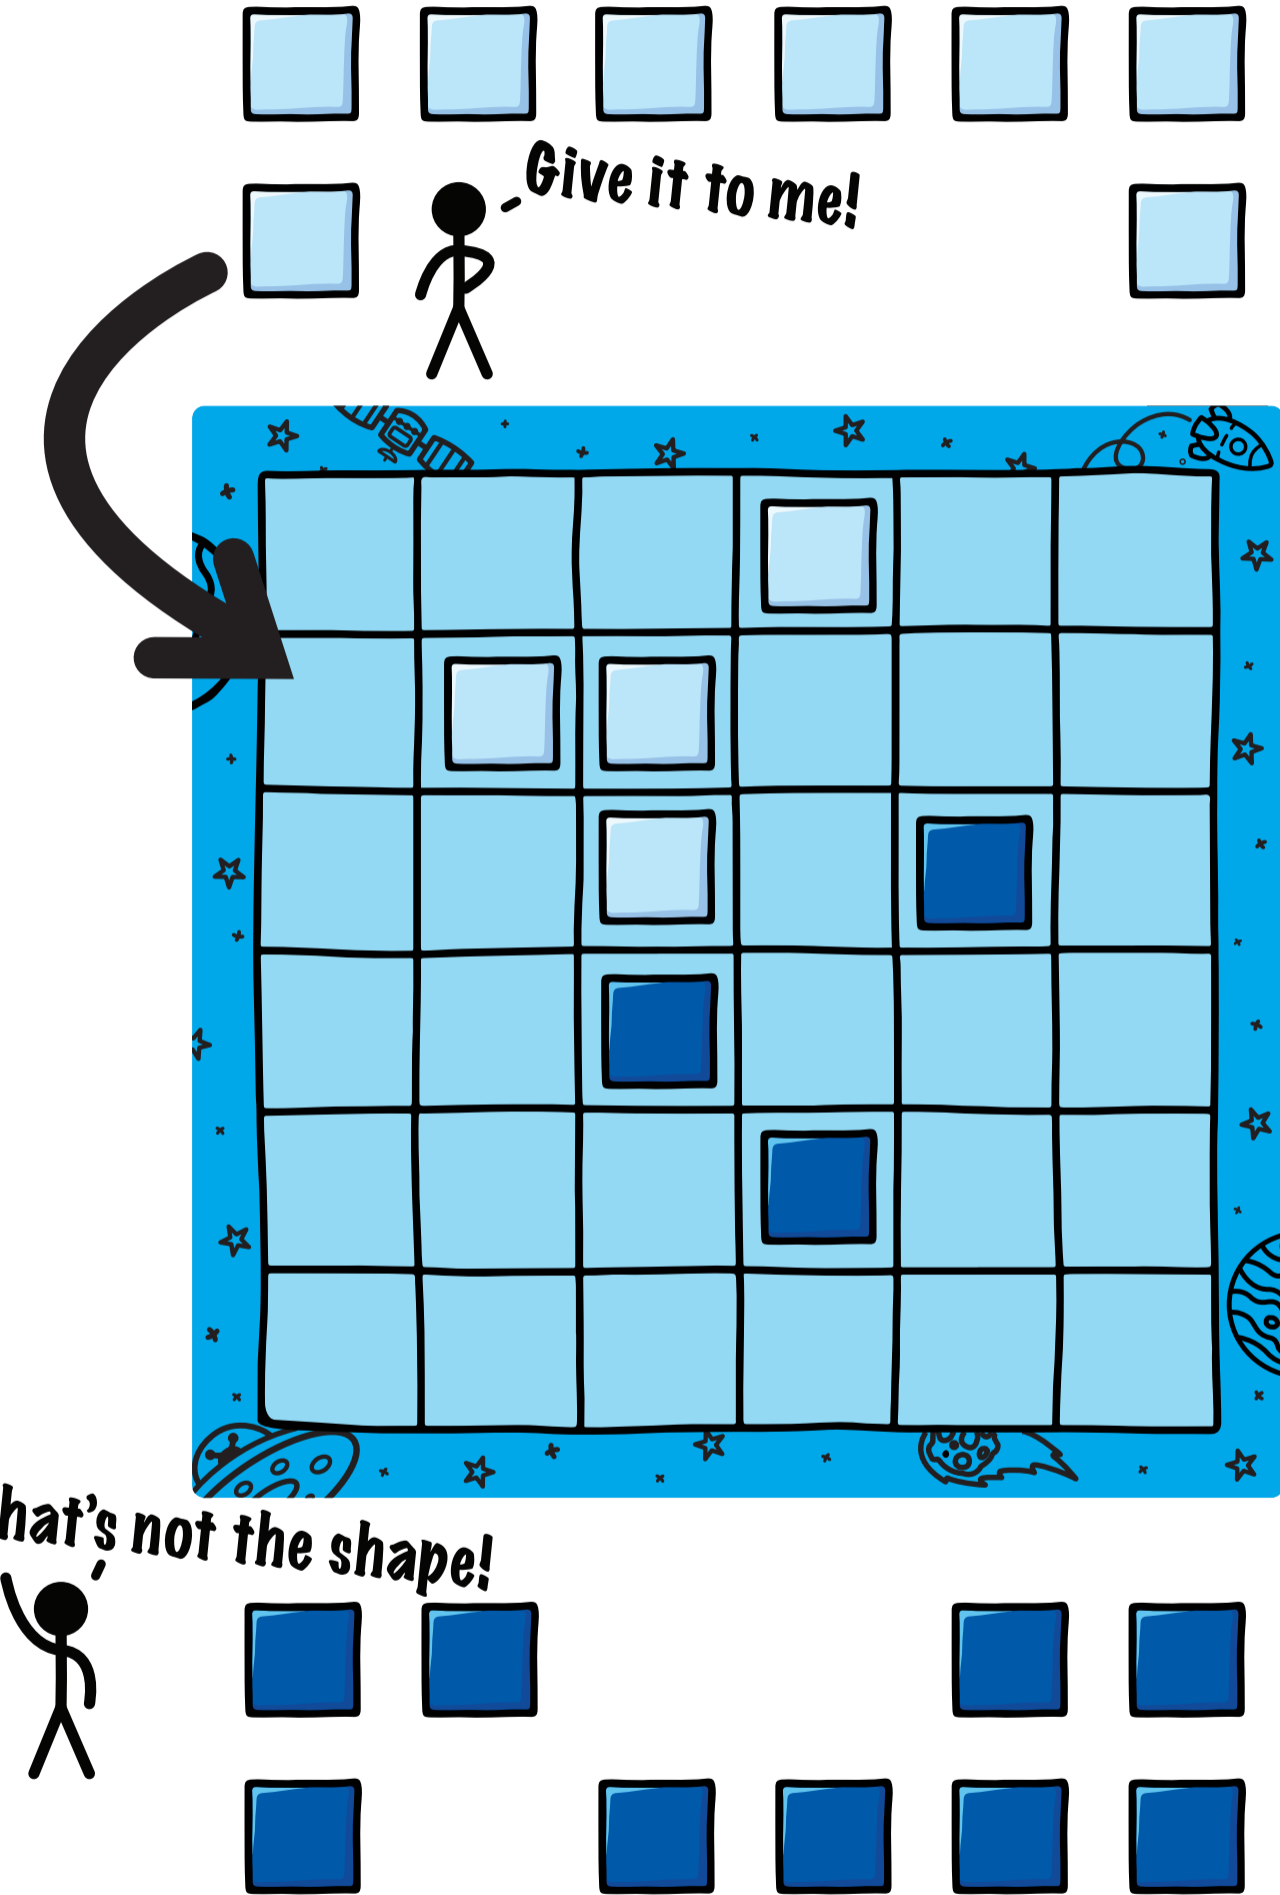

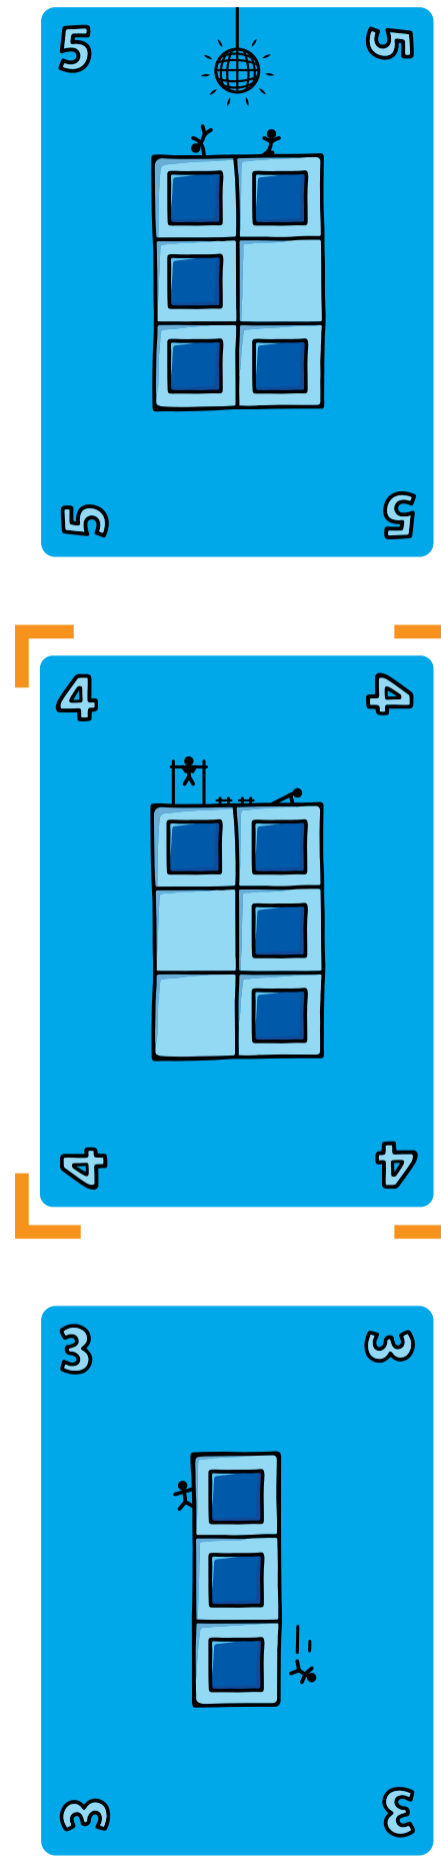

Note: See how they're blocking their rival from making this shape? Nice move!

# Rotation

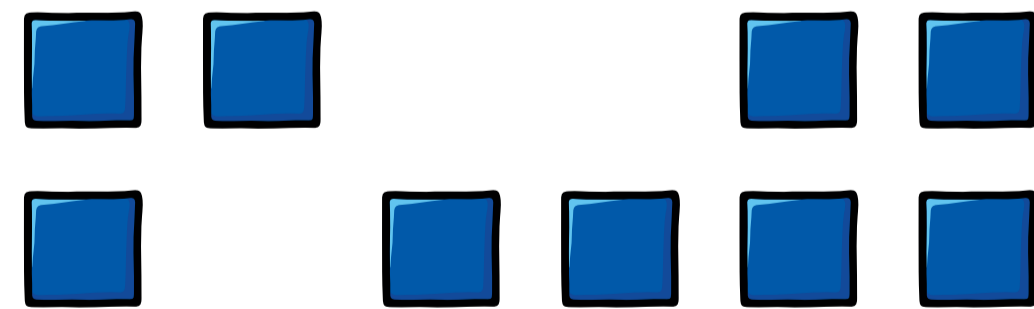

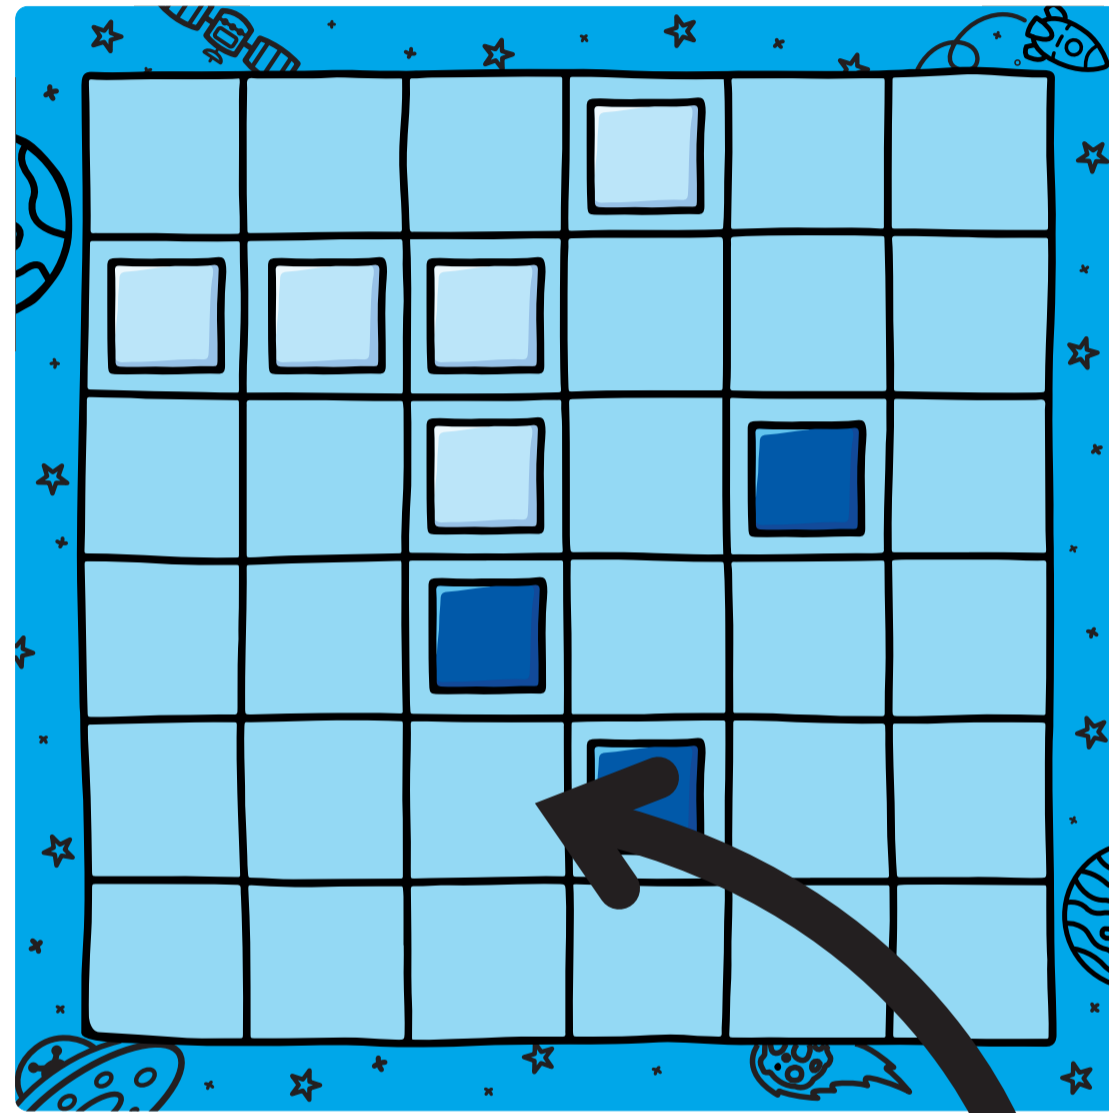

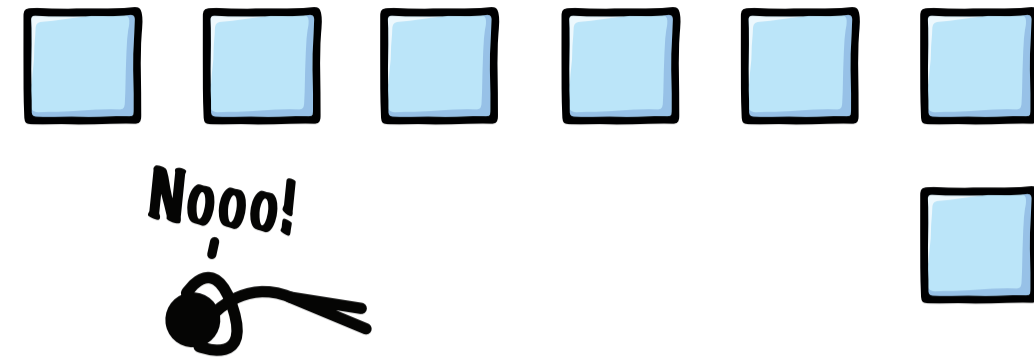

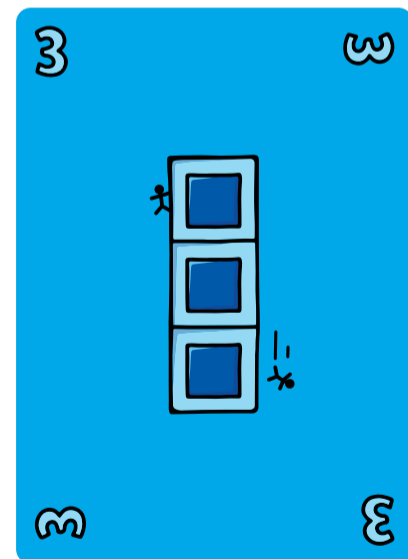

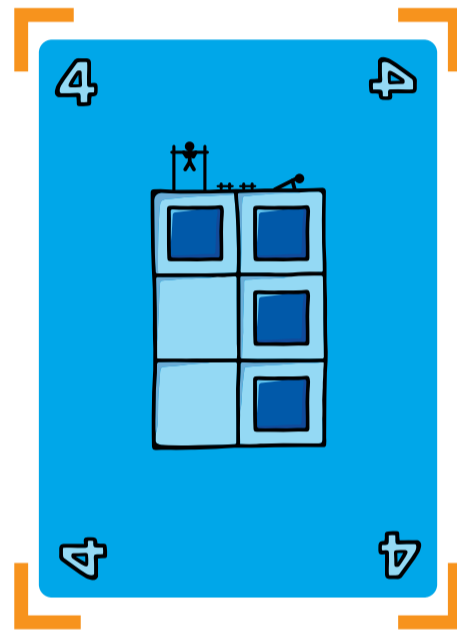

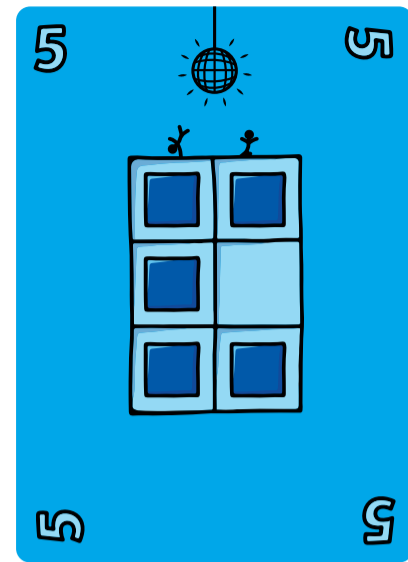

Shapes can be completed in any 90 degree rotation.

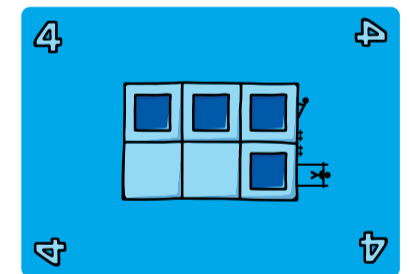

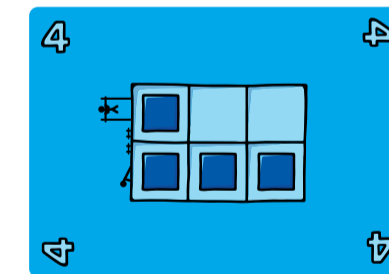

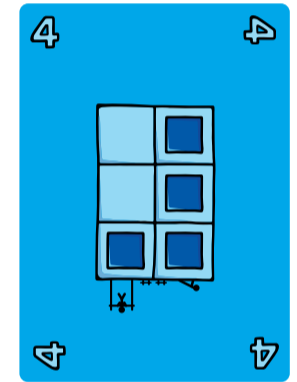

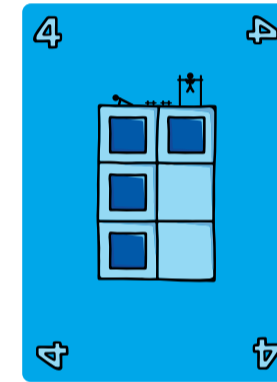

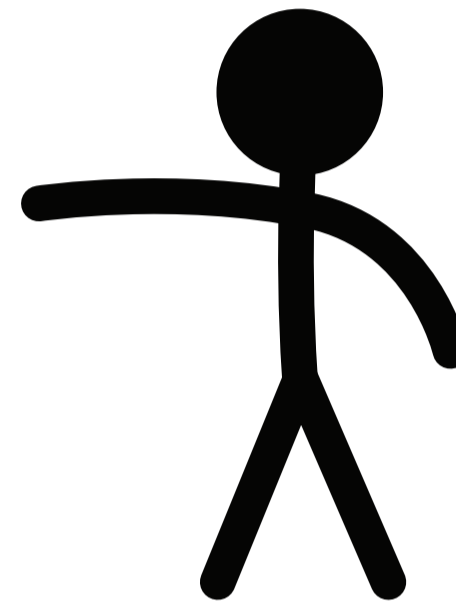

Examples of valid rotations

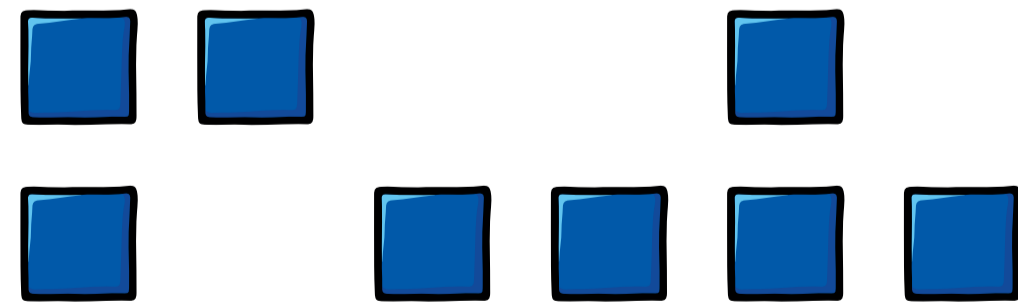

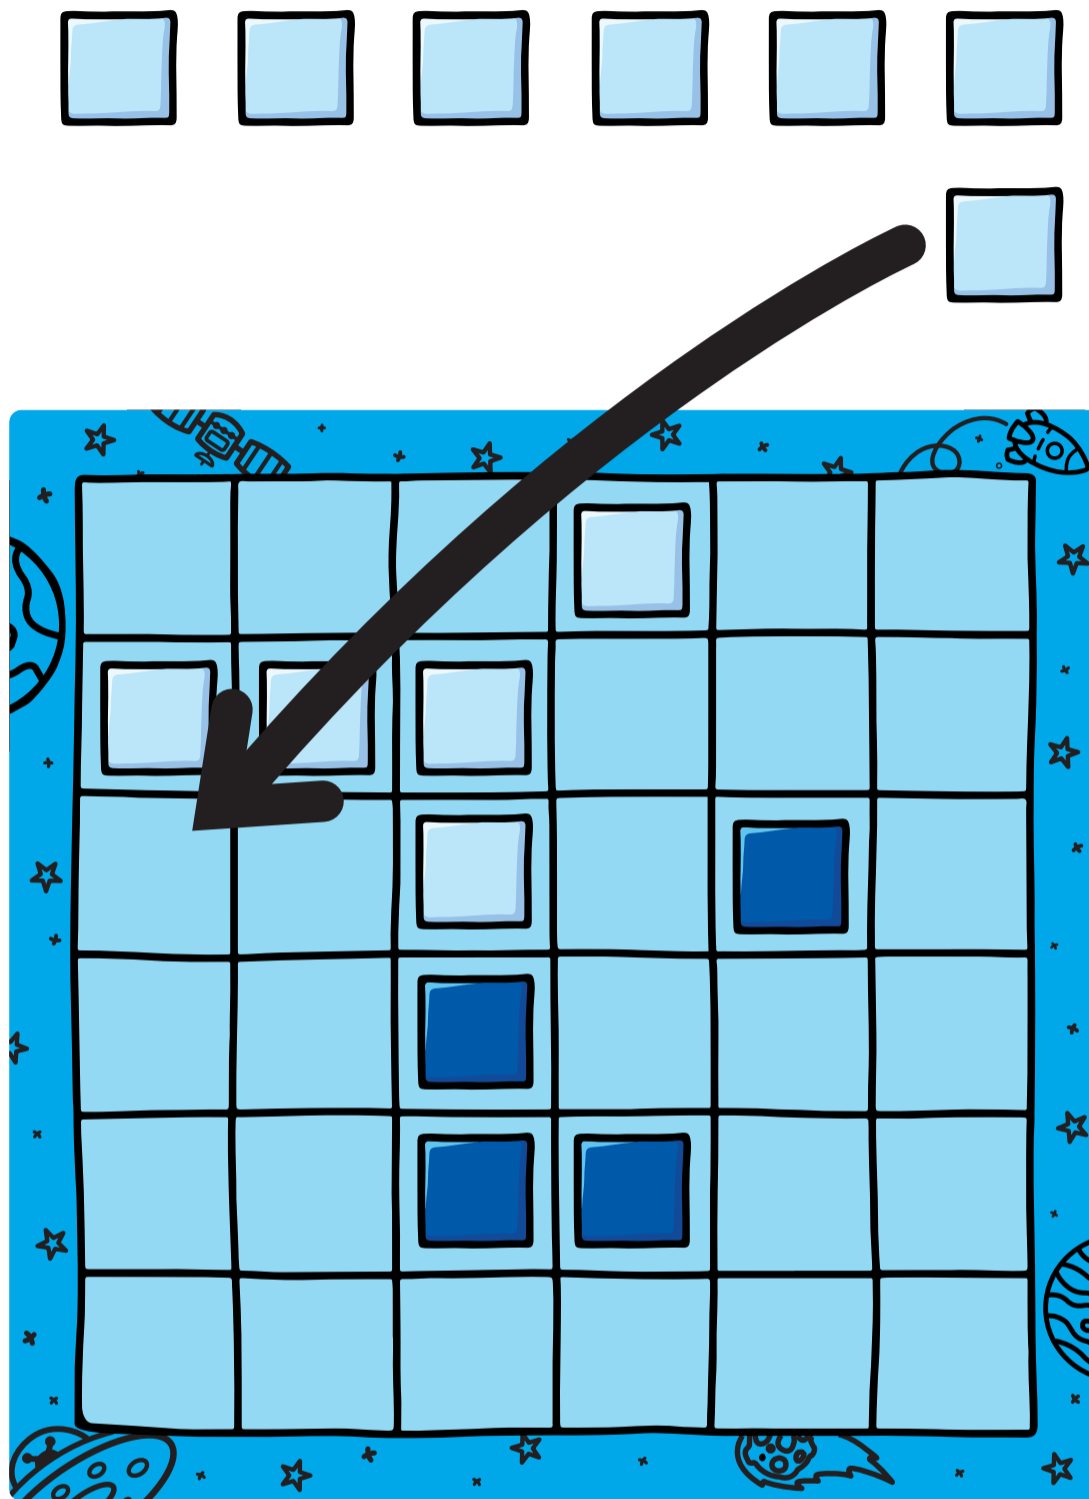

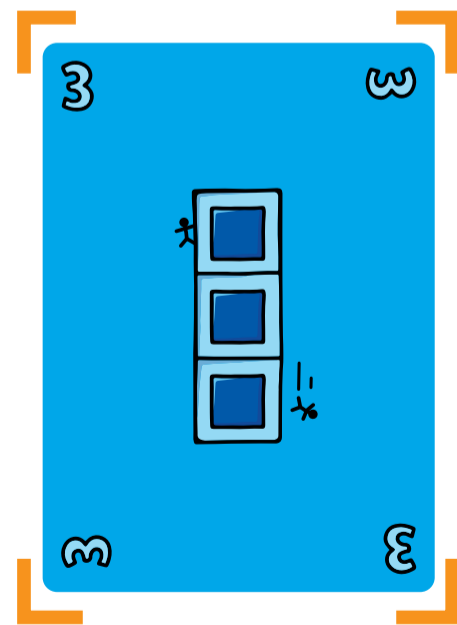

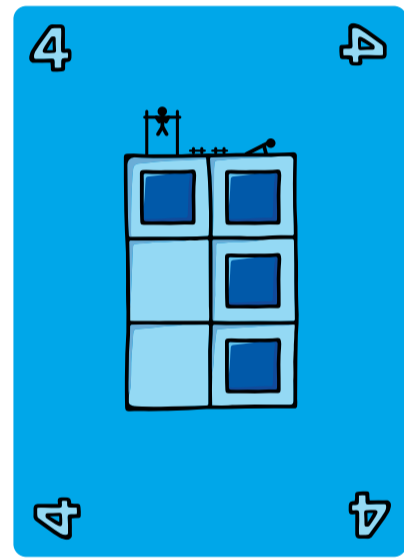

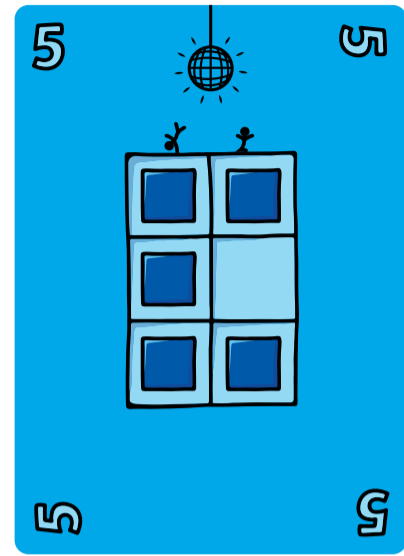

Shapes cannot be completed in a mirrored orientation.

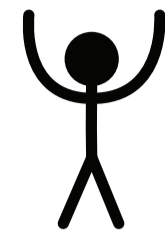

Examples of mirrored orientations

Note: Shapes can only be completed if a cube has been placed or moved to make the shape on the same turn.

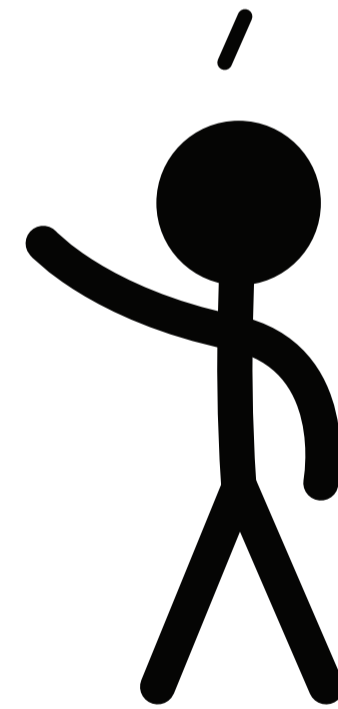

# Completion

HA HA HA  
YOU NEVER SAW IT COMING!!

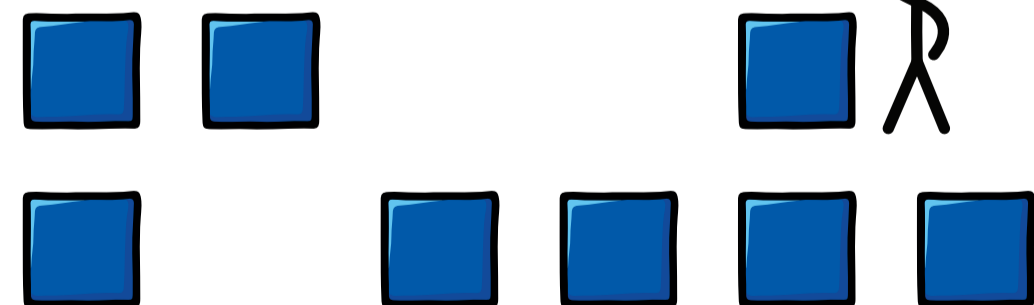

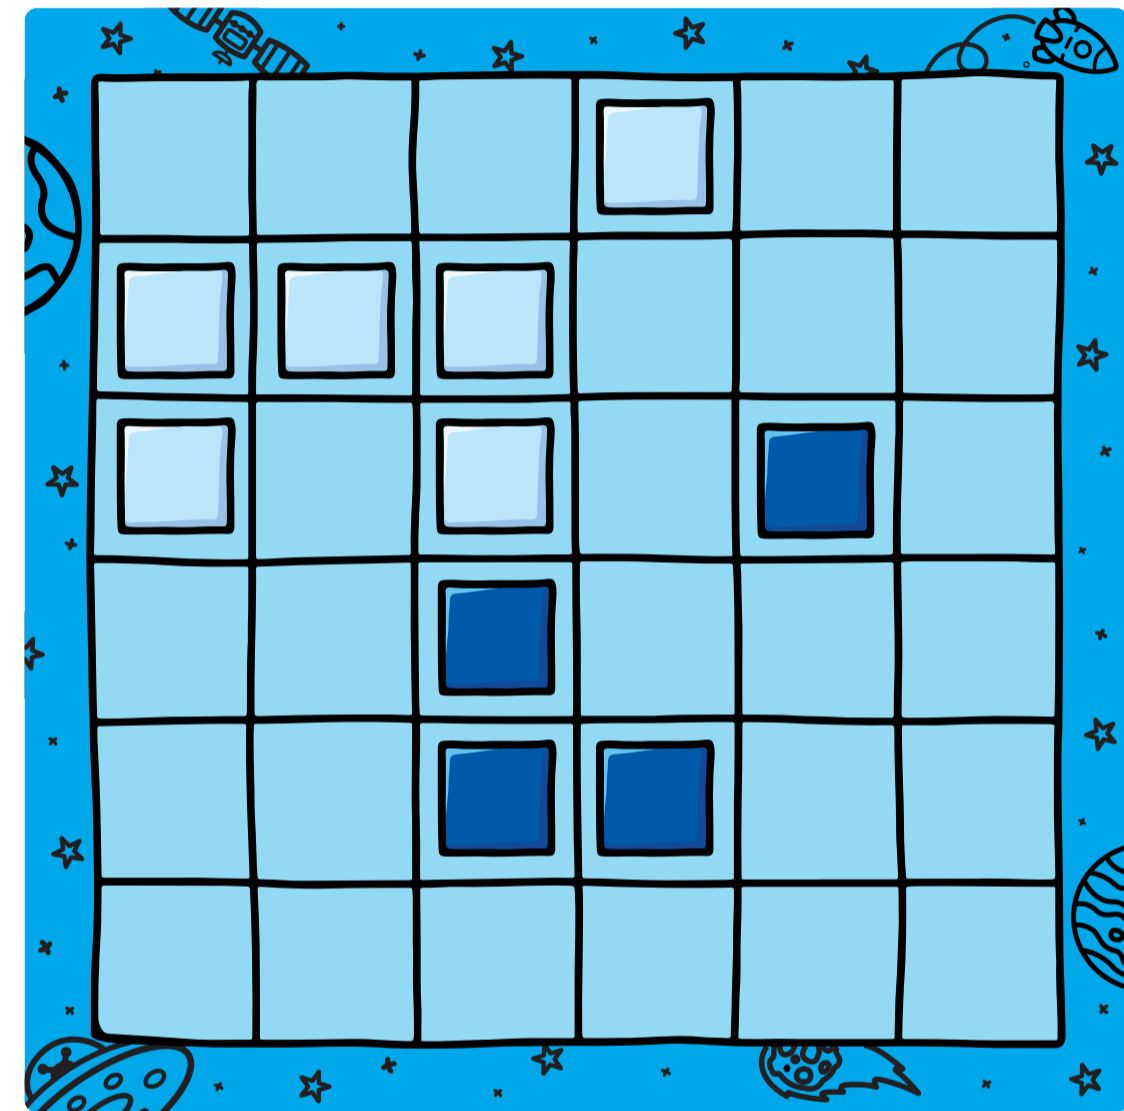

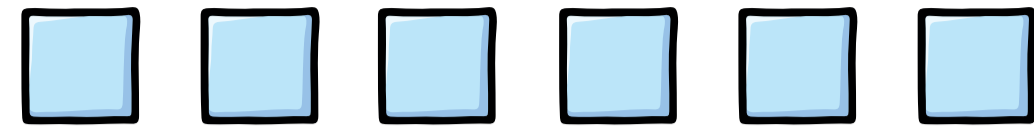

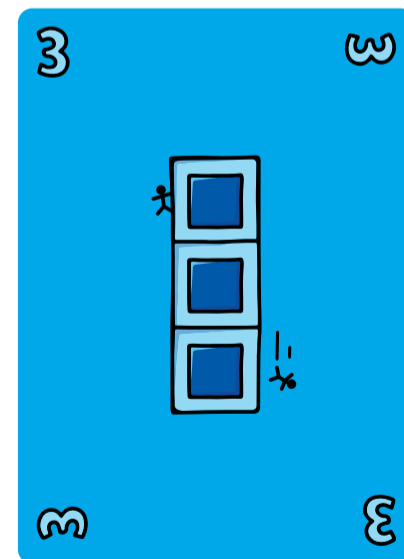

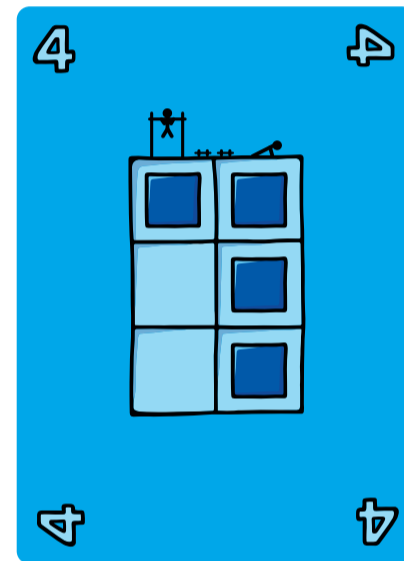

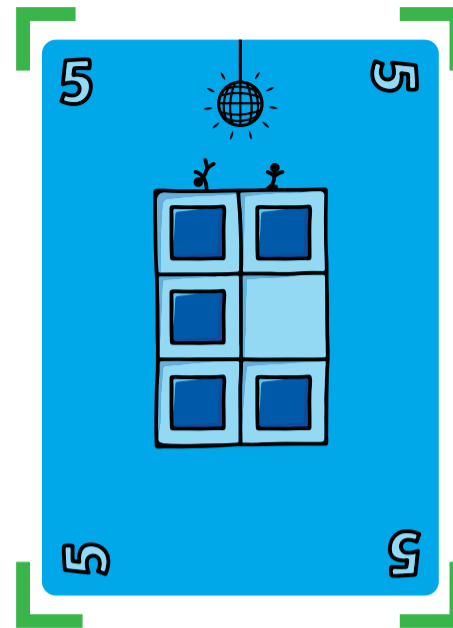

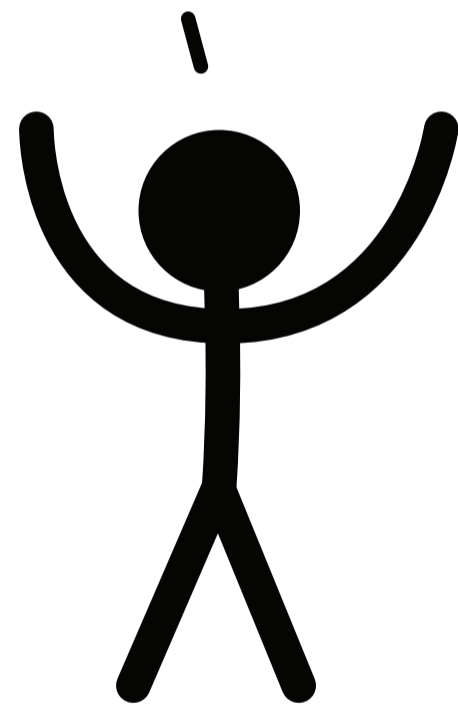

If a player doesn't see that their rival has made a public shape, and the next turn has already been played, then the shape cannot be taken.

Wait!  
- You completed this shape last turn!

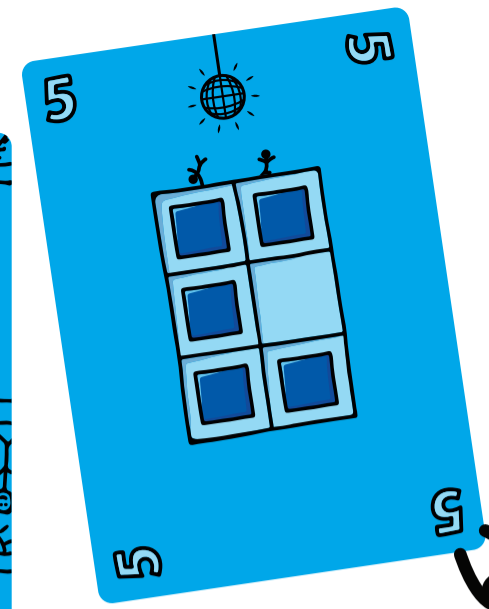

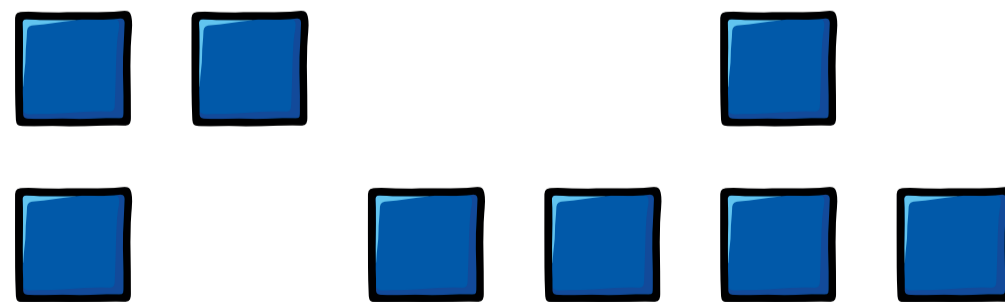

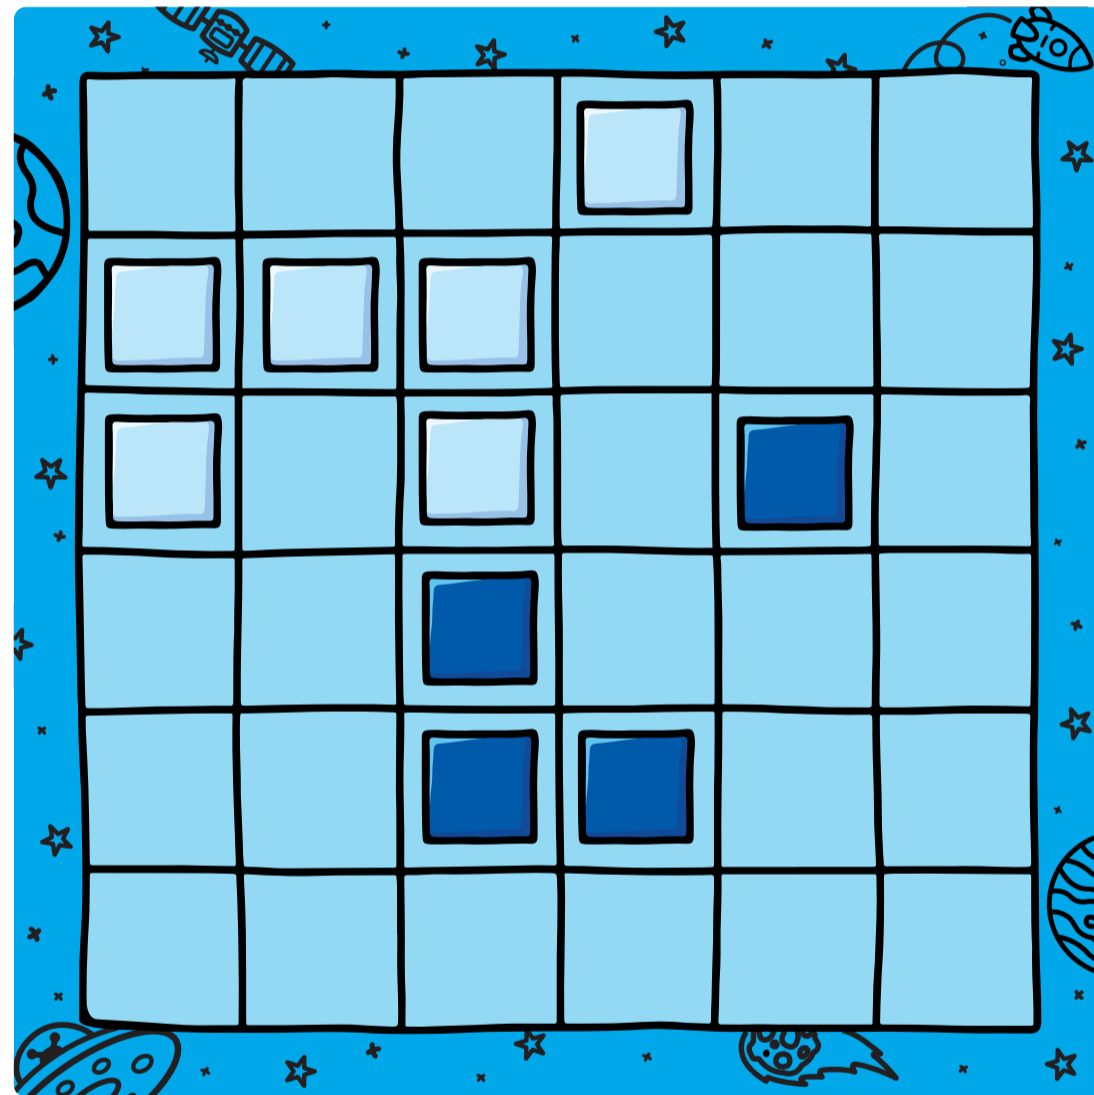

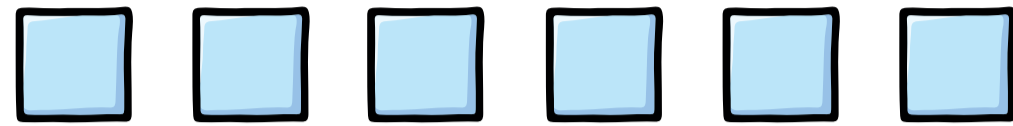

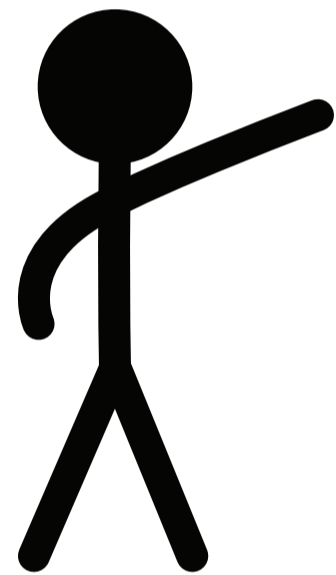

**Yay!**  
**A shape has been made!**  
**Show your opponent the shape**  
**before moving to the next steps**  
**so they can confirm it's valid.**

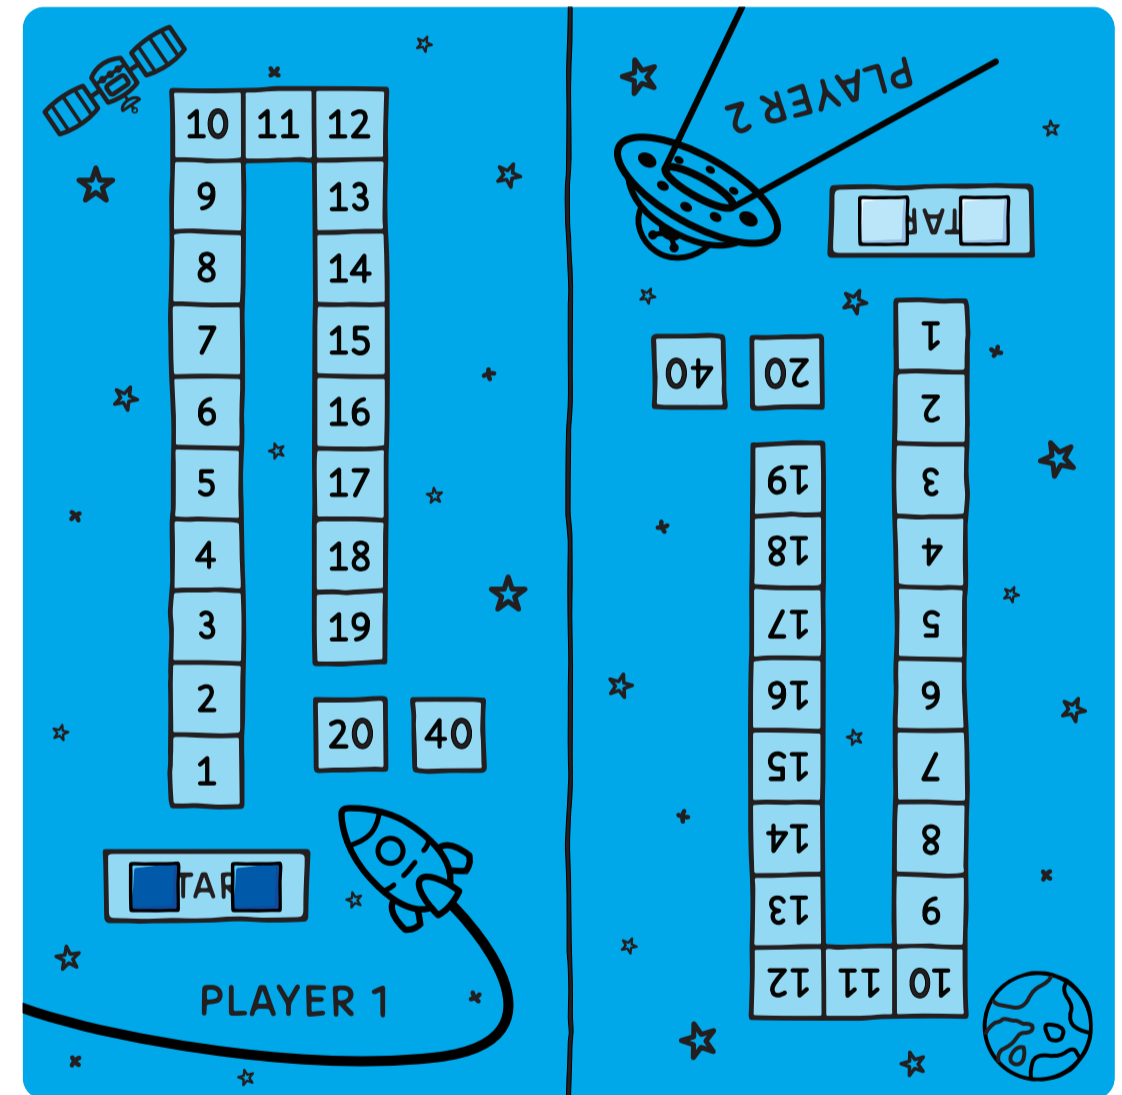

Note: If more than one shape can be made on the same turn, you can only complete one. Choose wisely!

# Resolution

Move the card over to your shape pile.

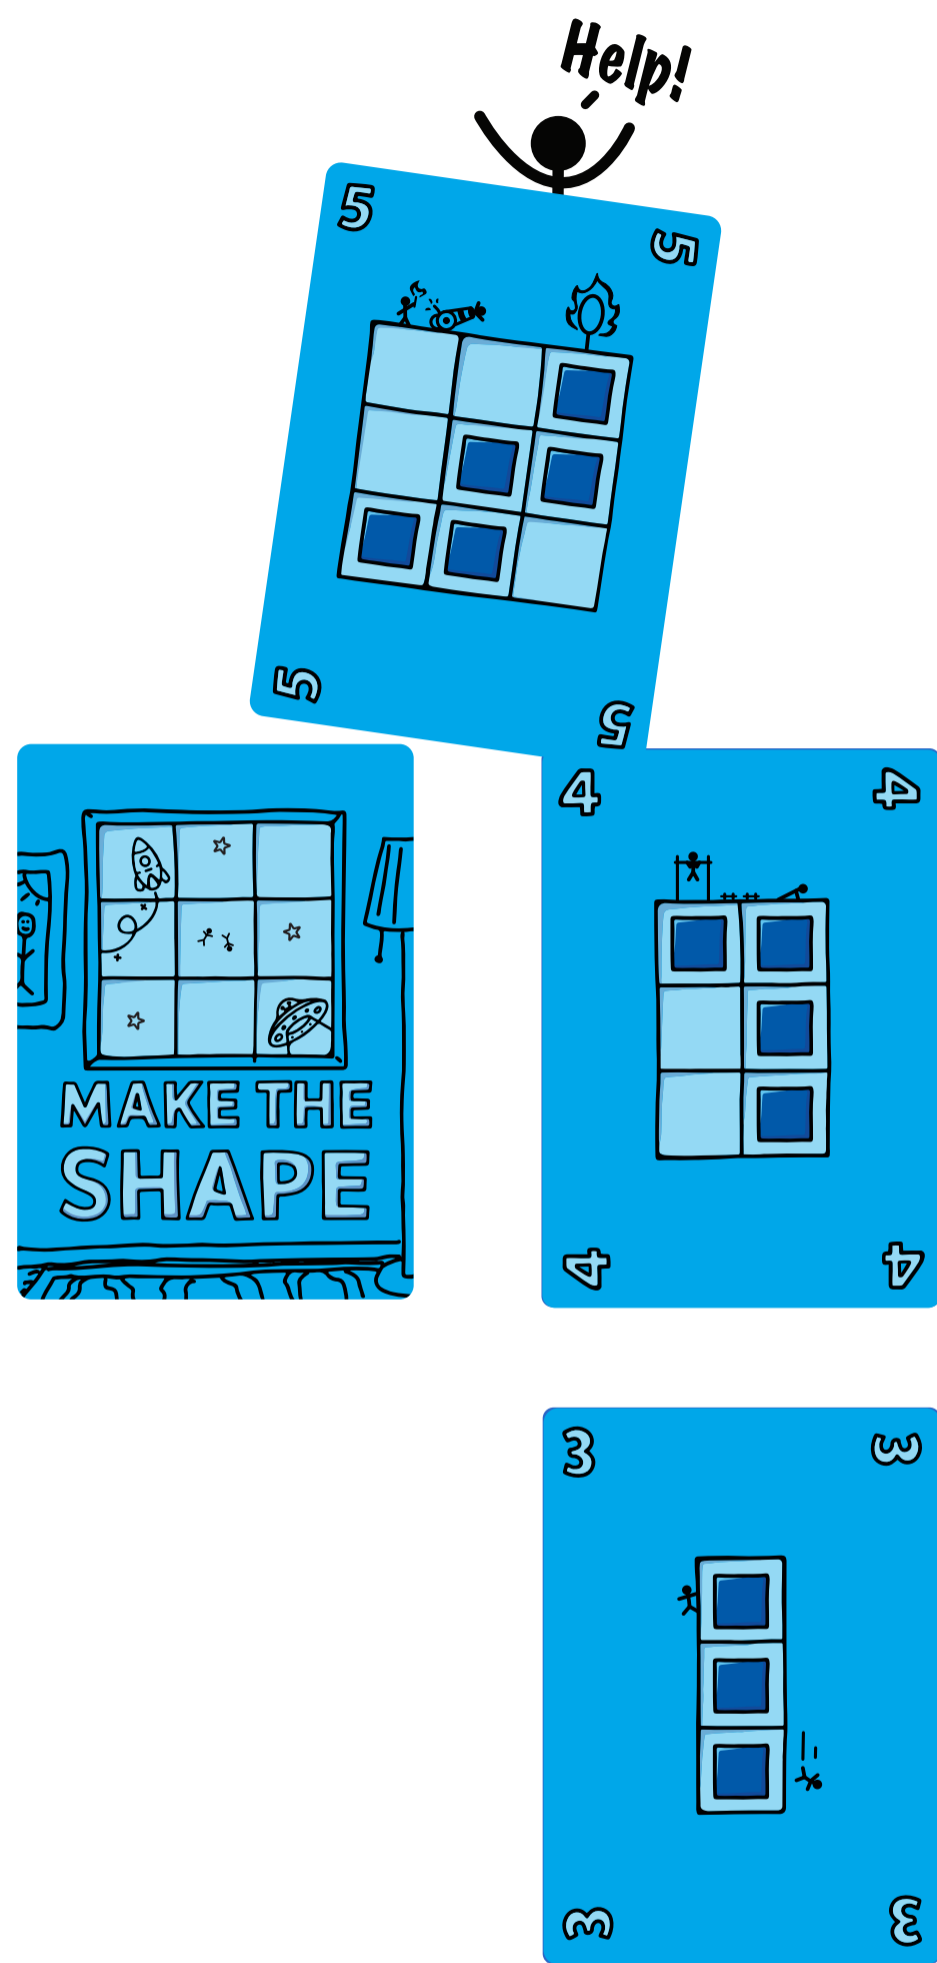

How are these heavier than the cubes?

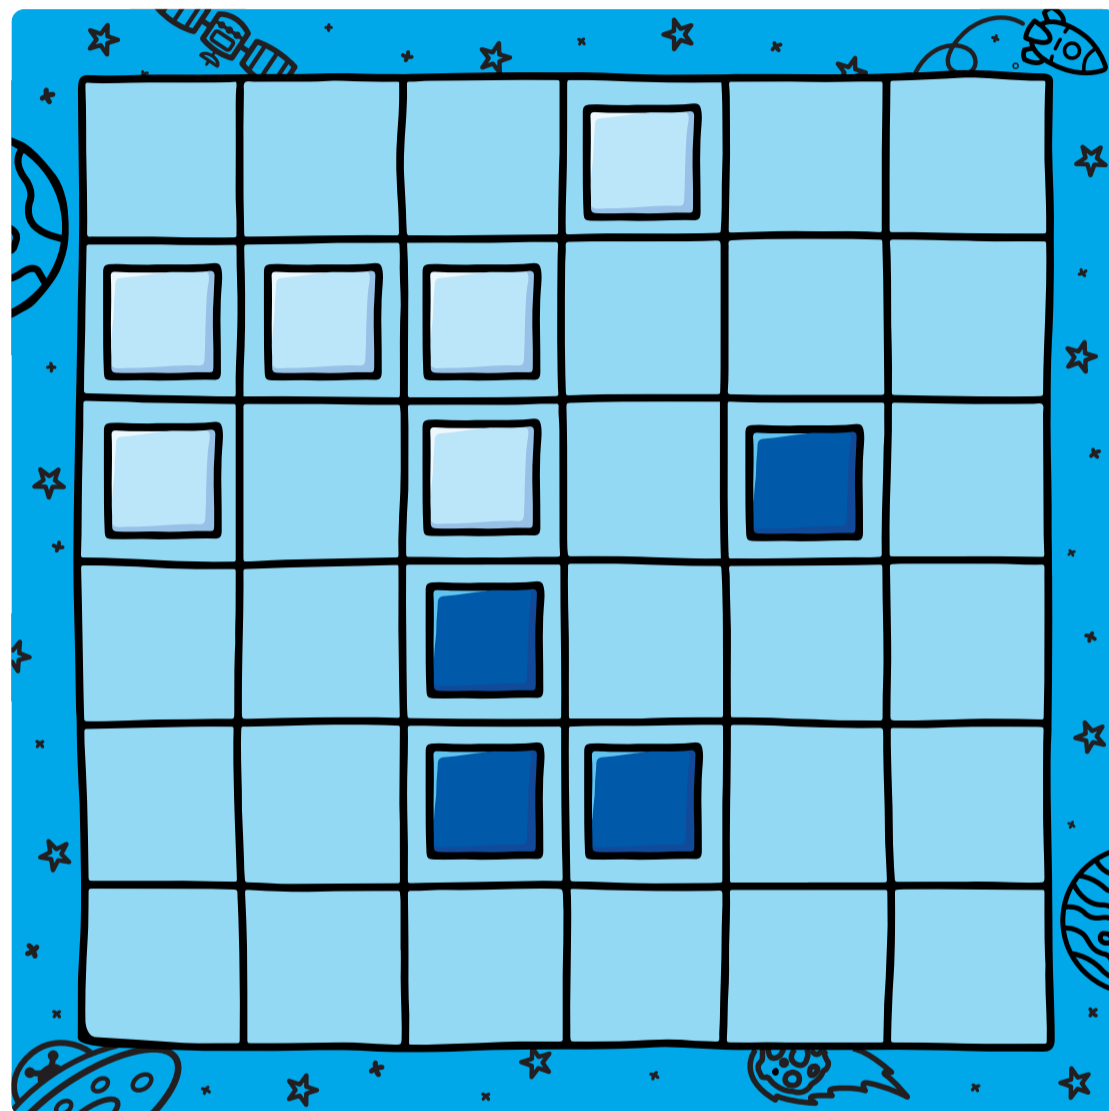

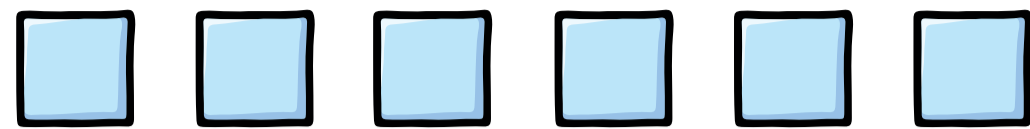

Lift with your legs!

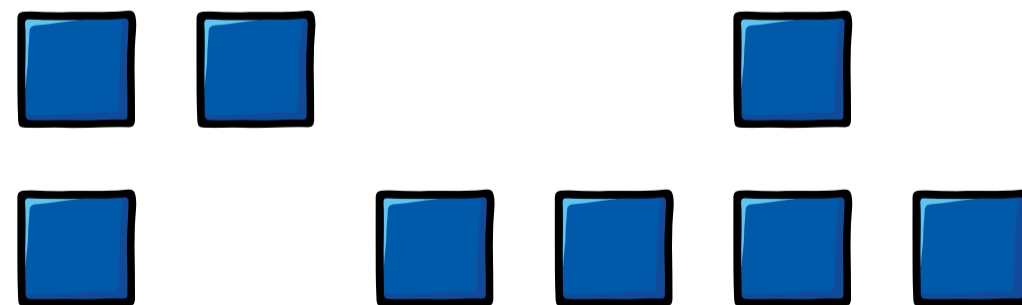

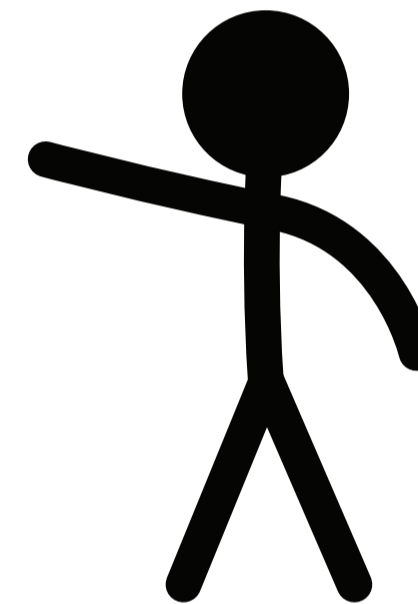

Help!

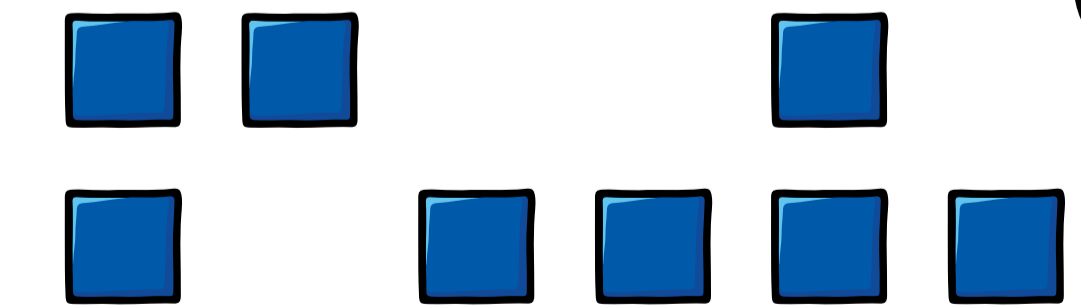

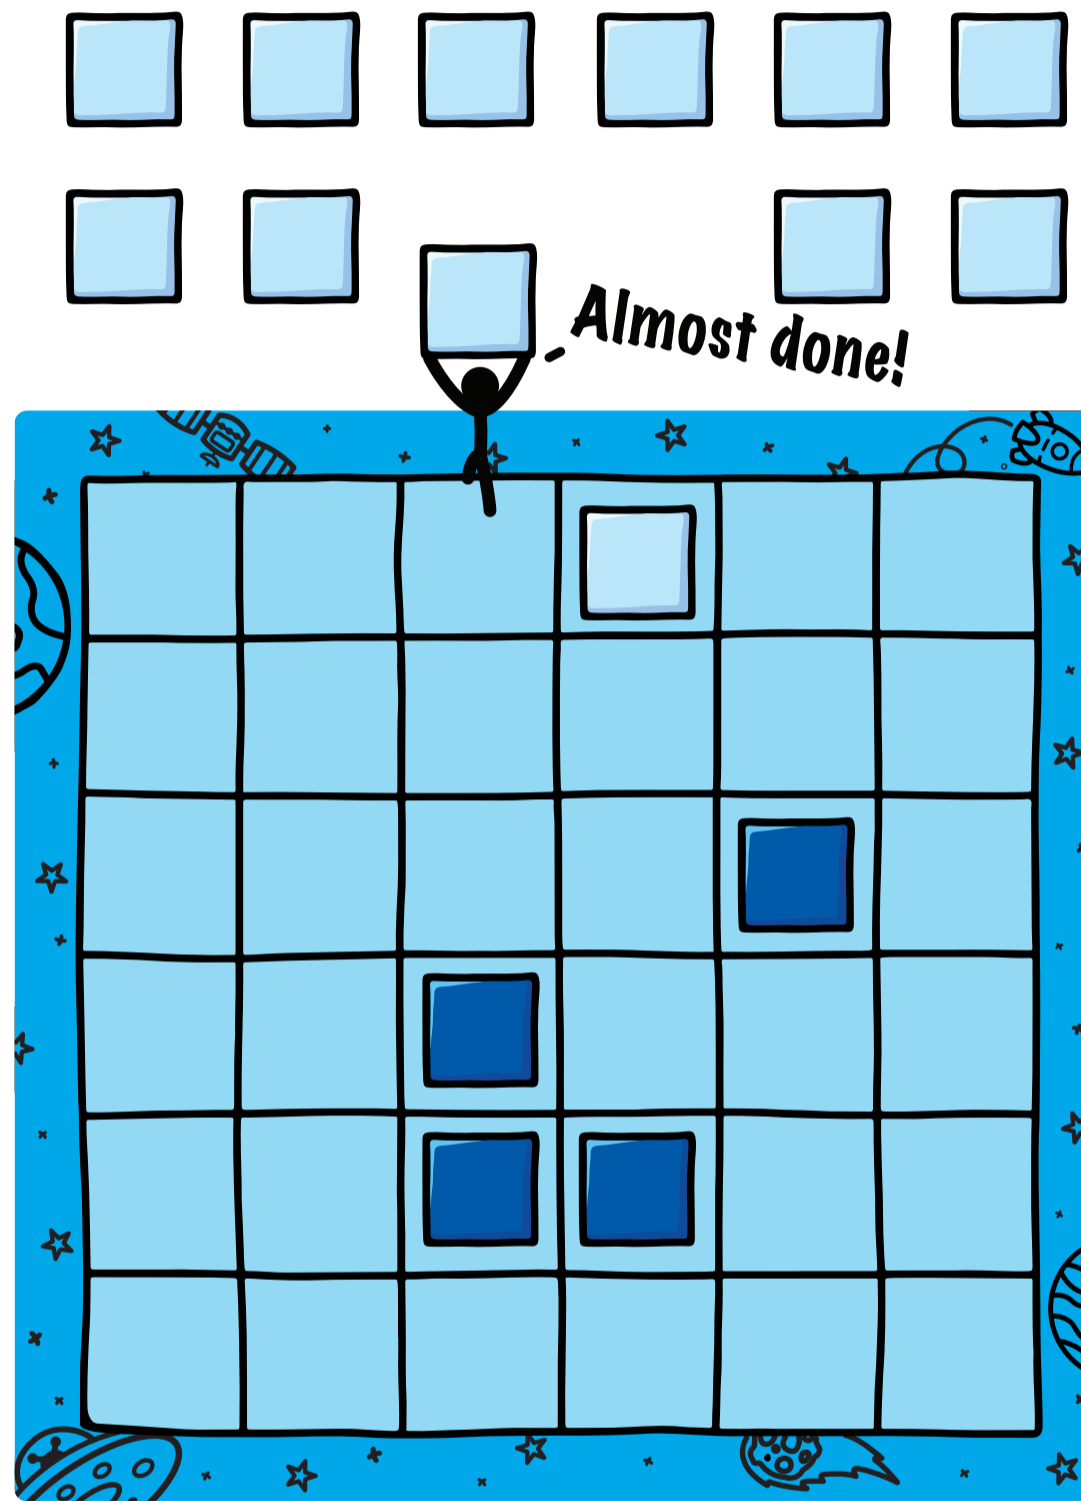

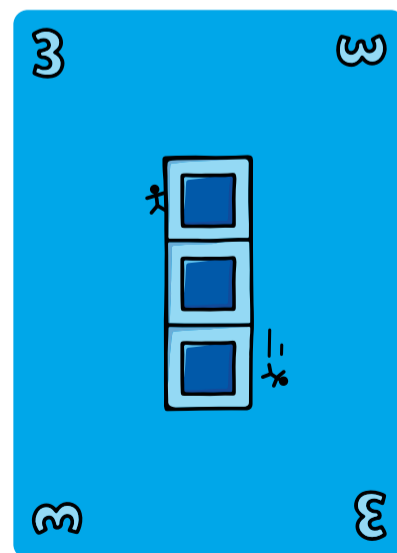

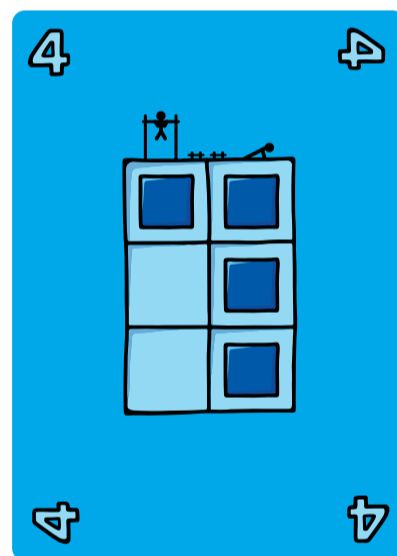

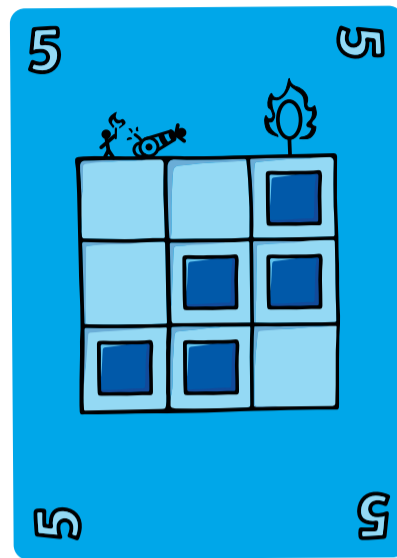

Flip over a new public shape card.

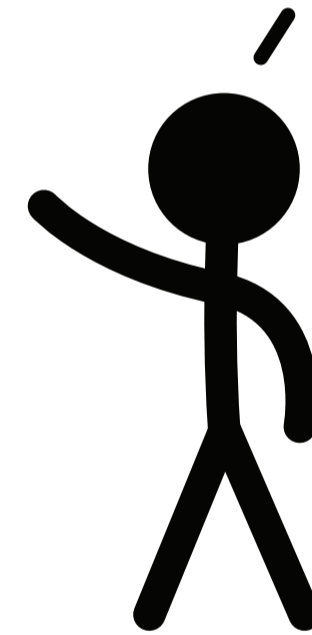

Ahahaha!

Note: If you have completed your secret shape, you can choose to complete it or not. If you do, reveal it, get a new secret shape, and follow the same steps.

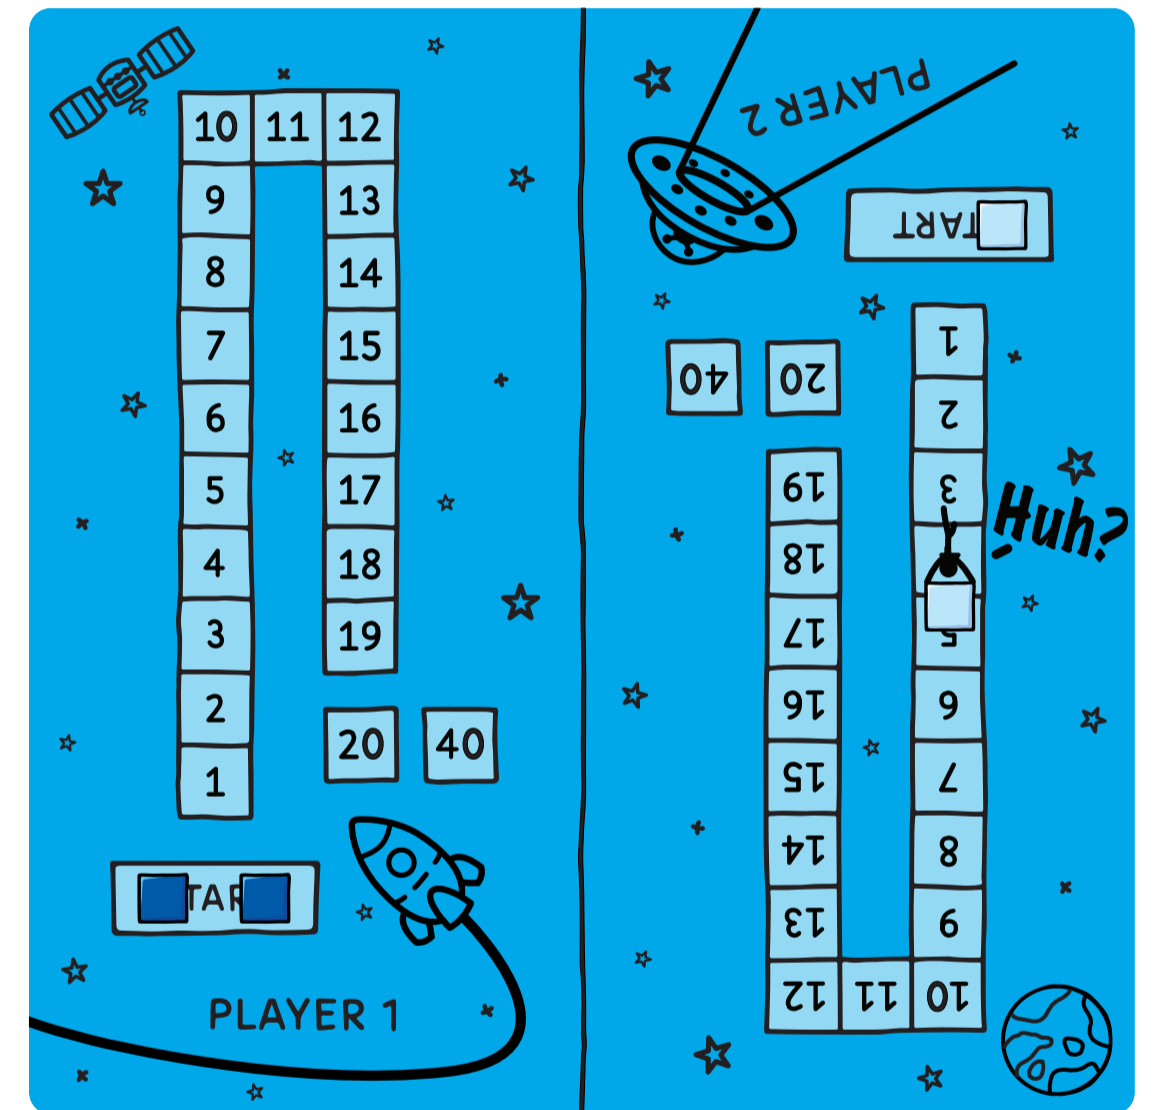

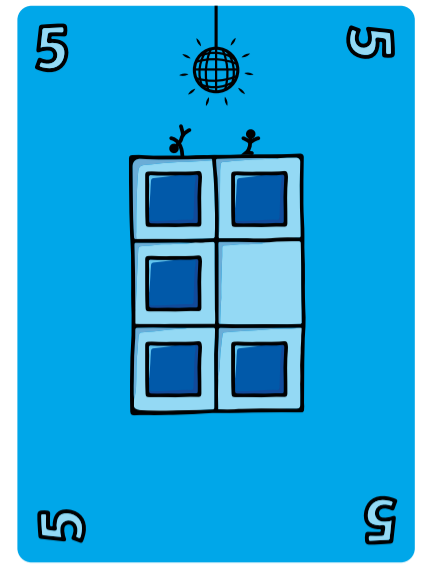

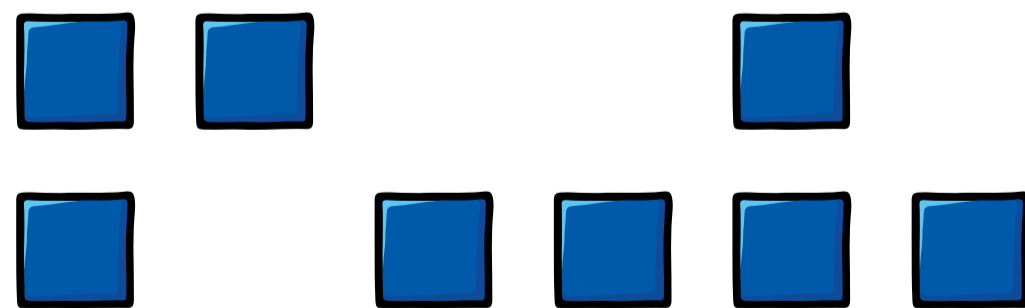

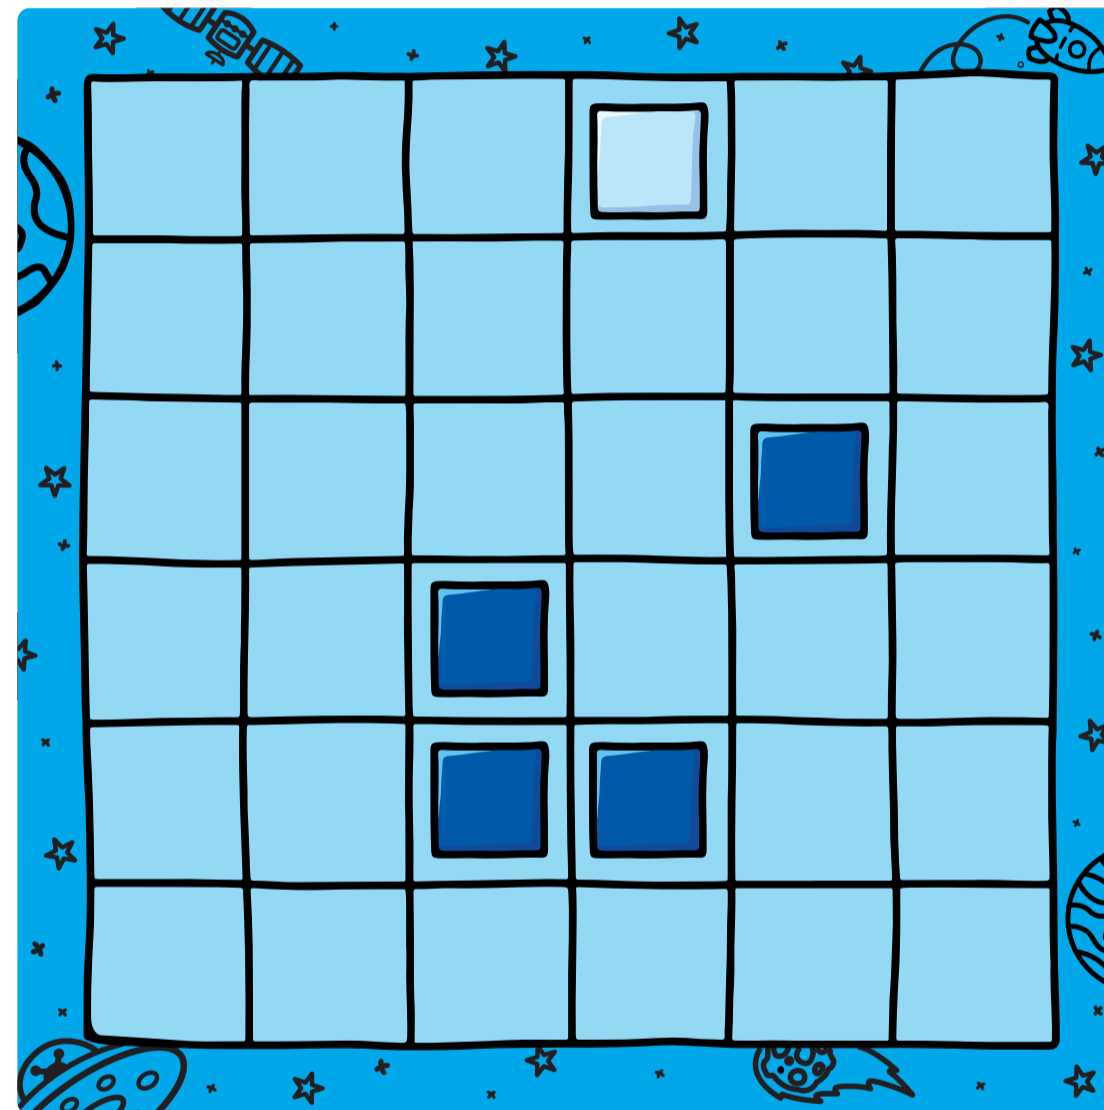

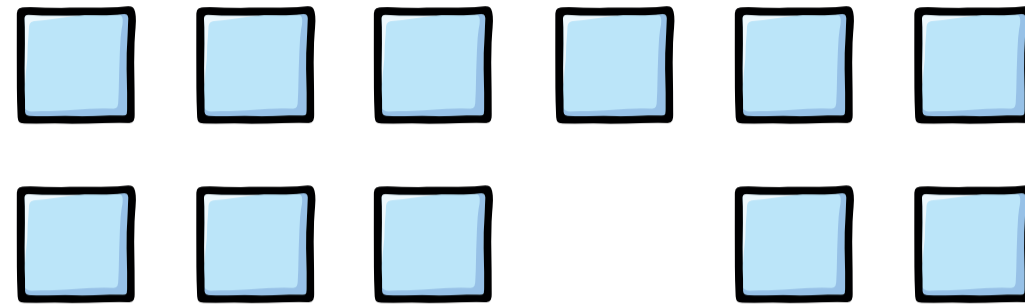

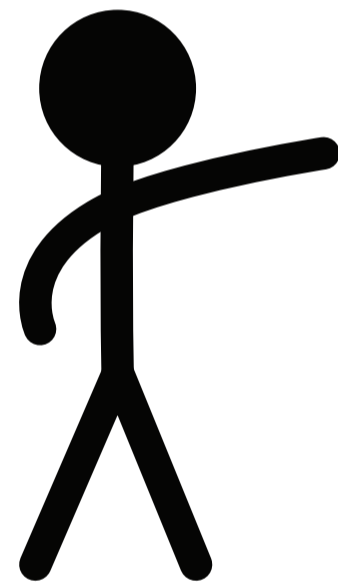

# Continue

Take all of the cubes back used to make that shape and put them back into your stock to reuse.

Add your points to the Score Tracker and then continue with the game until someone wins.

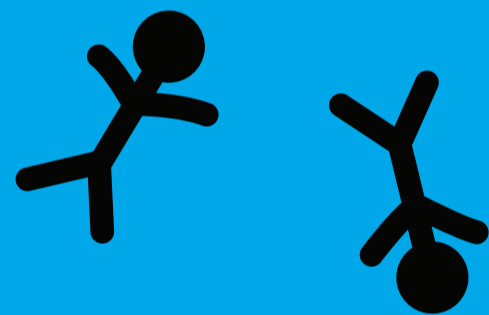

Did you get smaller?

Note: First player to 40 points wins! Only have 15 minutes? Play to 20 points!
