

PROSPERITEA

A Game of Artisanal Tea Blending

In Prosperitea, you are the proprietor of a small artisanal tea shop in a local neighborhood. Like all artisans, you pride yourself on your craftsmanship and strive to be the best in town. You will source ingredients, then blend them into a wide variety of teas to satisfy the demand of the locals. Hand crafted tea is a tight market and you won't be able to get by solely on your own. You'll need to cooperate with your neighbors to fill the most demanding orders and secure the most Prestige.

But fear not, helping others also helps yourself as you gain Favor Tokens that can be used to secure the rarest of ingredients with ease. In a tight community, a rising tide raises all ships, but it doesn't hurt to be the tallest of the fleet!

Game Setup

1. Shuffle the FOUR ingredient decks (Black, Green, Tisane, and Flavor).
2. Place the decks face up in a line.
3. Shuffle the Standard Order cards into ONE deck. Place that deck beneath the Ingredient decks.
4. Reveal TWO rows of THREE cards.
5. Shuffle the Premium Order cards into ONE deck. Place the deck beneath the second row of order cards.
6. Reveal THREE cards and place them in a row.
7. Place the coins and Favor Tokens in easy reach of all players. This is the reserve.
8. Hand a Reference Card to each set of TWO players.

First Player

1. Randomly determine the first player. (A randomizer app, Rock Paper Scissors, or number guessing are some examples)
2. Distribute the following resources in turn order:

Player	1	2	3	4	5	6
<i>AA</i>	3	2	2	1	1	0
Ingredient	1	2	2	3	3	4

NOTE: Players choose their Ingredient cards.

Setup Diagram

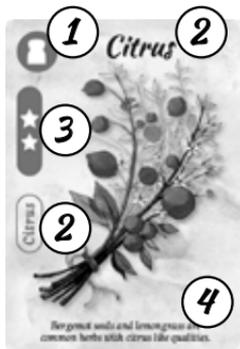

Your Tea Shop

The space in front of each player represents their Shop. Everything a player acquires throughout the game is placed in this space.

INGREDIENT CARDS

are placed in your shop FACE UP after you source them. You need Ingredient cards to fulfill orders. Ingredient cards have the following features:

1. Ingredient Type
2. Ingredient Name
3. Rarity
4. Fun Fact!

ORDER CARDS

are placed in your shop FACE UP when you score them for Prestige or discarded if you sell them for money.

1. Name of Tea
2. Ingredient List
3. Order Payouts

MONEY and **FAVOR TOKENS** are always visible to all players.

On Your Turn

Your turn consists of TWO phases: "Sourcing" and "Fulfillment."

Sourcing

During **Sourcing**, you may take cards from one of the four Ingredient decks. The number of cards you draw is determined by your Budget. Set your Budget based on the following options:

- 0#** - Take **ONE** card from the top of any ingredient deck.
- 3#** - Take **THREE** cards from the top of any ingredient deck.
- 5#** - Take **FOUR** cards from the top of any ingredient deck.

NOTE: You MUST commit your budget BEFORE you begin taking cards. When you decide on your budget, return the required amount of money from your inventory to the bank. When you are done taking cards, you may proceed to the next phase.

ADVERTISING: You may PASS on Sourcing ingredients to opt for Advertising. If you do, take **2#** from the bank, then discard any ONE order card from the market.

You may fill any amount of orders from the marketplace as long as you have the ingredients to fill them. To fill an order, you can do either of the following options:

SOLO: Claim an Order from the market and discard all of the required ingredients from your hand. Place them face down into their respective discard piles. You may then collect the benefits of that order.

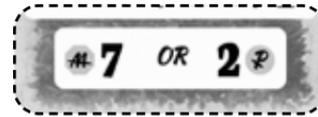

CO-OP: If you do not wish to use all of your own ingredients, you may ask other players for specific ingredients to help fill an order. You do not have to mention which order you are filling, but you **MUST** provide at least one ingredient for the order.

ALL players discard the required ingredients into the discard piles, but the Active Player is the only one that is allowed to collect the reward from that order. The assisting players will claim ONE Favor Token for their efforts. (see next page for more info)

FAVOR TOKENS can be used as any single ingredient on a future order. Unused tokens also count as **1P** during Final Scoring. There is no limit to the number of Favor Tokens a player can hold. **HOWEVER**, there are only twelve in the game.

When an order is filled, there are two possible payouts at the bottom of the card:

SELL: You may discard the order immediately to take the **#** value printed on the left of the card and add it to your inventory. You will need **#** to source ingredients. Excess **#** at the end of the game is converted to Prestige.

DISPLAY: You may decide to keep a card and place it on display in your shop. This will earn you the Prestige value on the right of the card.

At the end of the game, the Player with the most Prestige is the winner!

When you remove an order card, immediately replace the card with one from the same type of order deck (Standard or Premium). When you are done filling orders, pass the Active Player token to your LEFT to end your turn.

EVERGREEN ORDER: You may also turn in cards for any of the Evergreen orders on the Reference Cards. Evergreen orders are simple teas that do not earn prestige, but are reliable ways to generate a small amount of profit to source more Ingredients.

Game End

The game continues until one of the Order Decks are emptied. When this happens, finish the current round and tally your Final Score.

Final Score

Prestige: Add the P value of all order cards displayed in your tea shop.

Favor Tokens: 1 P for each Favor Token.

Money: 1 P for every 5~~A~~.

The player with the most **Prestige** is the winner!

Breaking Ties

1. If there is a tie; whoever has the highest RAW Prestige total wins.
2. If there is still a tie; whoever has the most Favor Tokens wins.
3. If there is still a tie; the game is tied.
