APPENDIX

CONSOLIDATE: Move up to X of your Influence from any Sectors to the targeted Sector to ADD X. Cannot ADD Influence if you did not move any to this Sector.

- >1: TEAL PLAYS AN ARCANOTECH CARD ENABLING THEM TO CONSOLIDATE 1 ARCANO COMPLEX. THEY DECIDE TO MOVE 1 INFLUENCE FROM THE MAZE TO ARCANO COMPLEX.
>2: THIS ALLOWS THEM TO ALSO ADD 1 THERE.

MARCH: Move at least X of your Influence from 1 Sector into an adjacent Sector. Cannot MARCH with fewer than X Influence.

ELIMINATE 1 in either Sector (the Sector you moved out of or into). Cannot ELIMINATE if you did not move Influence.

OPPORTUNIST: ADD X in any 1 Sector that has an Operation Token. In other words, can be used to ADD Influence to a Sector where there is an Operation Token on at least one border. If this is the burned card, treat its Sector as 'any 1 Sector that has an Operation Token'.

SPEND: Remove any number of your Influence from the targeted Sector. The number you remove determines the value of 'X' for the next action. For example if a player played the following card:

If they choose to remove 2, they would then ADD 3 adjacent to Arcano Complex.

INVEST: ADD 1. Must remove Status Token OR place Invest Token in targeted Sector. If you have a Status Token already in this Sector and want to ADD 1 you must remove your own Status Token.

RIOT: ADD 1. Must remove Status Token OR place Riot Token in targeted Sector. If you have a Status Token already in this Sector and want to ADD 1 you must remove your own Status Token.

INVEST: The owner of this Token may ADD 1 if at any point Opponent Influence is increased in this Sector. This can be triggered by any effects that bring in new Opponent Influence including: PUSH, PULL, REPLACE etc.

If an Opponent's Influence is increased by more than 1 in a single turn, you only get to ADD 1. If more than 1 Opponents' Influence is increased in a turn, you still only get to ADD 1. If the invest owner's final Influence is removed via a Replace effect, they would not get to ADD 1.

"TRY PUSHING OR PULLING OPPONENT INFLUENCE INTO YOUR INVEST SECTORS TO PLACE MORE INFLUENCE THERE."

RIOT: Instead of the specified Sector/s, the owner of this Token may always choose to target this Sector with their Actions. If you have a Riot Token on The Works for example; you may act as if each effect that specifies a Sector ends with 'OR THE WORKS'.

Clarification: You cannot spend Influence from Riot Sectors to fulfill Operations that are not present in that Sector.

SIMULATION

- >1: ADD 1 BAZAAR OR SPACE DOCKS OR THE WORKS.
>2: SPEND X ARCANO COMPLEX OR THE WORKS.

Clone scientists, Mu and Nu, were the first to discover an ancient alien outpost deep within the moon's core. Using their unique talents, they unlocked the secrets of the alien genome and technology, sparking a renaissance for the moon's struggling mining industry. The ensuing alien-mania provided the twins with

the perfect opportunity to establish a new alien-centric religion, the Arcano Order. However, Nu's obsession with resurrecting the aliens caused a schism, leading them to join Bio Fed's shadowy black lab projects, while Mu evolved the doctrine of the Arcano Order into an all-encompassing tech religion, now called Arcanotech.

This disparate and fiercely independent group owes allegiance only to their ship. Born into the lifeless void of space, their lives are short and brutal, defined by high risk and equally high rewards for those who survive long enough to enjoy them. Despite their lack of loyalty to each other, they are, however,

united in their belief that they are the true lifeblood of the Shadow Moon. Intent on claiming a dominant position on the moon, Black Star is now on a direct collision course with any Syndicate that stands in their way.

AGGRESSION

COMPLEXITY

These disposable mass-produced androids are the unobtrusive and menial workers that make the privileged lives' one of ease. As cleaners, janitors, gardeners, and vending machine repair technicians, they blend seamlessly into the everyday operations of legitimate service companies, granting them widespread

access across the Moon. Yet, hidden among their ranks is a covert series of counterfeit androids, engineered to infiltrate high-value targets. Whether it is intelligence, corporate espionage, or traceless assassinations, Glaze's true identity and mission remain Shadow Moon's greatest secret.

AGGRESSION

COMPLEXITY

Once unwelcome refugees fleeing a planetary war in a neighbouring system, the displaced found themselves exploited by Messiers Reach, which swiftly capitalised on their plight. The corporation established shelters on the Moon's surface, named after the suns from their lost systems. Known collectively as the Lost Suns,

they were indoctrinated with the Messiers mantra of a new life, and charged to perform the Moon's most dangerous and gruelling tasks. What is a carefully guarded secret is an illegal narcotics network run by Messiers Reach, promising the illusion of true freedom to only the most loyal of Lost Sun followers.

AGGRESSION
◇◇◇

COMPLEXITY

Messiers Reach outwardly projects an image of philanthropy. Originally established by a humanitarian crisis, its purpose is to help refugees start new lives. Through celebrity endorsed charity events, emergency Surface Shelters were built to house these displaced people, with the Reach providing

essential survival needs in exchange for free labour. Now, years later the Lost Sun's are an indentured workforce, tasked with the Moon's most undesirable jobs. Including the highly profitable illegal narcotics trade, which conveniently supplies the very celebrities who publicly endorse Messier's fundraising efforts.

OFF WORLD HOLDINGS

OFF WORLD HOLDINGS INVEST IN A LIMITED NUMBER OF SECTORS, BUILDING THEM UP TO SCORE MANY KREDITS.

> SECTOR - BAZAAR

AGGRESSION

COMPLEXITY

The remote operators of the Mega-Corp, this sprawling interstellar shell company, provide off-world agents with the means to operate on Shadow Moon with total anonymity, free from the interference and profiteering of the Founders. However, there is a catch. The anonymous owner of the inter-system beam-

in technology takes pleasure in humiliating these corporate overlords just as much as they profit from them. In a satirical twist, every agent is forced to choose from a selection of second-hand robots, including cleaning and mining models, amusement park droids, and sexbots.
