

## **Solo rules**

### **Setup**

Construct the grid as per the standard game. Prepare the deck as normal with the Island and Finish cards then split roughly into two. Shuffle a single Start card into one of the halves and place it on top of the other half deck to form one draw pile.

### **Gameplay**

All gameplay and hand limits remain the same as with 2-5 players with one exception. When playing the Start card the player must first draw eight cards into their hand before deciding which eight to discard and which four to keep.
