Wok and Roll can also be played as a single player game!

To play Wok and Roll solitaire, follow the rules for the Simple or Expert Menu as per normal, but carry out the following changes:

1. During the Game Setup phase, write the numbers 1-10 on your menu. This is for marking the 10 rounds in the game. Erase one number every round, so that you can track which round you are in.
2. There will be no distinction between the white and red dice in the solo game. The player will roll all 6 dice every turn, and have the ability to re-roll twice as per normal.
3. The game ends after 10 rounds. Tally your taste points and compare it with the tables below:
